**Status of the course in the study program:**

Obligatory course, Faculty of Electronics and Telecommunications, field Electronics and Telecommunications.

**Assumptions and objectives of the course:**

The student should know basic problems relating to random processes and statistics.

**Contents of the course (course description):**

Gaussian processes. Processes with independent increments. Counting process. Poisson process. Stationary processes. Data description. Estimation. Statistical inference.

**Introductory courses and the required pre-knowledge:**

Probability and random variables.

**Courses form and teaching methods:**

Lectures and exercises.

**Form and terms of complete the course - requirements and assessment methods:**

Written tests and examination.
