Title Optical Communication	Code 1018011410108300067
Field Electronics and Telecommunications	Year / Semester 2 / 4
Specialty	Course
•	core
Hours	Number of credits
Lectures: 2 Classes: - Laboratory: - Projects / seminars: -	0
	Language
	polish

Lecturer:

dr inż. Zbigniew Szymański

Katedra Systemów Telekomunikacyjnych i Optoelektroniki

e-mail: zszyma@et.put.poznan.pl

Faculty:

Faculty of Electronics and Telecommunications

ul. Piotrowo 3A 60-965 Poznań

tel. (061) 665-2293, fax. (061) 665-2572

e-mail: office_det@put.poznan.pl

Status of the course in the study program:

Obligatory course for students of Electronics and Telecommunications.

Assumptions and objectives of the course:

To make the students familiar with properties of elements and modules of optical communication

Contents of the course (course description):

Principles of light propagation. Step index, graded index, and single-mode optical fibers, numerical aperture and acceptance angle. Modes in optical waveguides. Mode and chromatic dispersion. Transmission characteristics. Non-linear effects. Methods of measuring attenuation and dispersion. Optical fibre cables, installation principles. Connecting fibres, joints and connectors. Optical sources, light-emitting and laser diodes, principles of operation, parameters. Photodiodes and optical receivers. Basic elements of an optical transmission system. Design principles. The idea of WDM, WDM couplers, optical filters.

Introductory courses and the required pre-knowledge:

Basic knowledge of electromagnetic wave propagation and the bases of semiconductors operation.

Courses form and teaching methods:

Lectures, laboratories and projects.

Form and terms of complete the course - requirements and assessment methods:

Tests, individual projects, and written exam.

Basic Bibliography:

Additional Bibliography:

.
