

Title Engineering Diploma Seminar (Seminarium dyplomowe inż.)	Code 1010401271010430722
Field TECHNICAL PHYSICS	Year / Semester 4 / 7
Specjalty -	Course core
Hours Lectures: - Classes: 2 Laboratory: - Projects / seminars: -	Number of credits 10
	Language polish

Lecturer:

prof. dr hab. Mirosław Drozdowski
Wydział Fizyki Technicznej
60-965 Poznań, ul. Nieszawska 13A
tel. (0-61) 665-3160, fax: 665-3201
e-mail: office_dtpf@put.poznan.pl

Faculty:

Faculty of Technical Physics
ul. Nieszawska 13A
60-965 Poznań
tel. (061) 665-3160, fax. (061) 665-3201
e-mail: office_dtpf@put.poznan.pl

Status of the course in the study program:

Core course of the study for Technical Physics, Faculty of Technical Physics.

Assumptions and objectives of the course:

Students should get familiar with a new technologies as well as experimental techniques of nanotechnology and quantum engineering.

Contents of the course (course description):

Teaching activities are addressed to the studies of the physical properties of a new materials and structures such as ferroelectrics, semiconducting single crystals, thin films, heterostructures and superlattices, high temperature superconductors, liquid crystals, synthetic and biological dyes, luminescent semiconducting compounds. Moreover, students should obtain the knowledge of a new technologies, as well as various experimental techniques focused on nanotechnology and quantum engineering being used in characterization and studies of the physical phenomena in different materials and structures. Presentation in seminar form different technologies and experimental techniques used in study being the subject of diploma thesis prepared.

Presentation and discussion of the results obtained ? connected with the research subject of diploma thesis.

Introductory courses and the required pre-knowledge:

Previous facultative courses included in study program.

Courses form and teaching methods:

Seminar.

Form and terms of complete the course - requirements and assessment methods:

Presentation of the seminar covering the proper research subject - connected with diploma thesis prepared.
