Status of the course in the study program:

-Obligatory course for the 3rd year students.

Assumptions and objectives of the course:

-Students should get knowledge of literature searching for dissertation (engineer's thesis, master's thesis) in: local and worldwide bibliographic databases, full text journals and e-books services, patents' description services, the library online catalogues, multimedia and internet resources.

Contents of the course (course description):

- definition of the subject matter and basic arguments for dissertation (engineer's thesis, master's thesis),
- formulation of the basic arguments of searching criteria and indication of searching tools for gaining, selecting, analyzing and converting the received information (HAN system, LinkSource tool, the A-Z list and others),
- classes in retrospective and current literature searching for dissertations in discipline databases: bibliographic (local and worldwide) online and local access, electronic fulltext journals and e-books services, patents' descriptions,
- classes in searching of literary fulltext information sources with the help of the network library catalogues, bibliographies and other printed guides,
- gaining information sources through interlibrary loans,
- classes in using multimedia and internet sources

Introductory courses and the required pre-knowledge:

-

Courses form and teaching methods:

-Lecture supported by presentation and classes

Form and terms of complete the course - requirements and assessment methods:

-Credit based on the attendance list

Basic Bibliography:

-

Additional Bibliography:

-
