Status of the course in the study program:

Organic Chemical Technology 2

Assumptions and objectives of the course:

The aim of the subject is introduction students with industrial chemistry

Contents of the course (course description):

Technological principles, oil and petrochemicals, biomass - derived chemicals, clean up technology, pollution prevention

Introductory courses and the required pre-knowledge:

Organic chemistry knowledge

Courses form and teaching methods:

lectures

Form and terms of complete the course - requirements and assessment methods:

written test
