

STUDY MODULE DESCRIPTION FORM				
Name of the module/subject Hydraulics and Hydrology			Code 1010115111010130065	
Field of study Civil Engineering Extramural Second-cycle		Profile of study (general academic, practical) (brak)	Year /Semester 1 / 1	
Elective path/specialty Structural Engineering		Subject offered in: Polish	Course (compulsory, elective) obligatory	
Cycle of study: Second-cycle studies		Form of study (full-time,part-time) part-time		
No. of hours Lecture: 20 Classes: 10 Laboratory: - Project/seminars: -			No. of credits 3	
Status of the course in the study program (Basic, major, other) (university-wide, from another field) (brak) (brak)				
Education areas and fields of science and art technical sciences			ECTS distribution (number and %) 3 100%	
Responsible for subject / lecturer: dr inż. Marcin Skotnicki email: marcin.skotnicki@put.poznan.pl tel. 61 665 24 69 Faculty of Civil and Environmental Engineering ul. Piotrowo 5 60-965 Poznań				
Prerequisites in terms of knowledge, skills and social competencies:				
1	Knowledge	Knowledge of the mathematics, physics and fluid mechanics		
2	Skills	Student should be capable to apply knowledge to solve practical problems		
3	Social competencies	Student should be aware of results of taken decisions		
Assumptions and objectives of the course: Presentation of rules of fluid flows in different conditions				
Study outcomes and reference to the educational results for a field of study				
Knowledge:				
1. Student knows rules of pressure calculations and laws describing the pressure distribution in fluid - [K_W02] 2. Student knows rules of calculations of pipelines systems with pump stations - [K_W04, K_W8] 3. Student knows nonuniform and unsteady flow equations and its application - [K_W08]				
Skills:				
1. Student can compute the forces in fluid - [K_U01] 2. Student can compute pump parameters - [K_U13] 3. Student can evaluate water level profiles for different flow conditions - [K_U07, K_U13]				
Social competencies:				
1. Student is aware of the necessity of critical review of calculation results - [K_K02] 2. Student is aware of the necessity of risk evaluation in drainage and hydraulic structures designing - [K_K02, K_K04]				
Assessment methods of study outcomes				
Lectures - written test (15 -20 questions, duration up to 30 min) Exercises - written test (3-4 problems, duration up to 60 min) and activity				
Course description				

Conservation of momentum, nonuniform flows, unsteady flow equations (de Saint-Venant equations), outflow through orifices and nozzles, overflows, complex pipeline systems, pump parameters evaluation, water hammer phenomena

Result of average student's workload

Activity	Time (working hours)
1. Participation in lectures	20
2. Participation in excercises	10
3. Work at home	15
4. Preparation for test	5

Student's workload

Source of workload	hours	ECTS
Total workload	50	3
Contact hours	30	1
Practical activities	0	0
