

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Introduction to Telecommunications		Code 1010804151010830095
Field of study Electronics and Telecommunications	Profile of study (general academic, practical) general academic	Year /Semester 3 / 5
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) part-time	
No. of hours Lecture: - Classes: - Laboratory: 15 Project/seminars: -		No. of credits 2
Status of the course in the study program (Basic, major, other) major		(university-wide, from another field) from field
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 2 100% 2 100%
Responsible for subject / lecturer: dr inż. Michał Kasznia email: mkasznia@et.put.poznan.pl tel. 61 6653858 Faculty of Electronics and Telecommunications ul. Piotrowo 3A 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Has a systematic knowledge of mathematical analysis, algebra and theory of probability (K1_W01) Has a basic, systematic knowledge of physics(K1_W02) Has a detailed, systematic knowledge of the fundamentals of circuit theory (K1_W05) Has a systematic knowledge, together with necessary mathematical background, of 1D signal theory (K1_W06) Knows and understands basic concepts and methods of description of linear and non-linear electronic systems, control systems and telecommunications systems (K1_W10)
2	Skills	Is able to extract information from literature, databases and other sources (K1_U01) Is competent in a foreign language, knows the electronics and telecommunication terminology in this language (K1_U06) Is able to use known mathematical analysis, algebra and theory of probability concepts to solve basic problems in electronics and telecommunication (K1_U07) Demonstrates the ability to solve typical tasks and problems related to analysis of electrical circuits (K1_U09) Demonstrates the ability to solve problems related to signal analysis (K1_U10)
3	Social competencies	Is aware of the limitations of his/her current knowledge and skills; is committed to further self-study (K1_K01) Demonstrates responsibility and professionalism in solving technical problems. Is able to participate in collaborative projects (K1_K02)
Assumptions and objectives of the course: Presentation of the basic ideas of telecommunications, the techniques and principles that underlie the analysis, design, construction and maintenance of telecommunications systems and networks		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		

<p>1. Knows the principle of operation of digital transmission systems, including baseband transmission, digital modulations, signal transmission in channels, signal reception, forming the spectral properties of signals, countering channel distortions. - [K1_W15]</p> <p>2. Has a detailed, systematic knowledge, together with necessary mathematical background, of the fundamentals of the telecommunication theory, which is necessary to understand, analyze and evaluate the operation of analogue and digital telecommunications systems - [K1_W17]</p> <p>3. Knows about development trends in electronics and telecommunication - [K1_W24]</p>
Skills:
<p>1. Demonstrates the ability to solve problems related to signal analysis in time domain and frequency - [K1_U10]</p> <p>2. Is able to measure typical parameters of signals, systems and devices, in particular those used in telecommunication. Is able to choose appropriate methods to measure given electrical quantities and parameters of signals and devices. Is able to plan and perform measurements and analyze the results - [K1_U17]</p> <p>3. Is able to select the construction of devices according to technical requirements and service conditions - [K1_U21]</p>
Social competencies:
<p>1. Is aware of the limitations of his/her current knowledge and skills; is committed to further self-study - [K1_K01]</p> <p>2. Demonstrates responsibility and professionalism in solving technical problems. Is able to participate in collaborative projects - [K1_K02]</p> <p>3. Is aware of the main challenges facing electronics and telecommunication in the 21st century. Is aware of the impact electronics and ICT systems and networks will have on the development of the information society - [K1_K04]</p>

Assessment methods of study outcomes		
<p>1. Written test, reports from exercises</p> <p>2. Activity during exercises</p>		
Course description		
<p>Laboratory exercises</p> <ul style="list-style-type: none"> - modulation and demodulation of AM signals - modulation and demodulation of DSB-SC signals - modulation and demodulation of SSB signals - modulation and demodulation of FM signals - phase-locked loop in telecommunication systems 		
Basic bibliography:		
<p>1. S. Haykin, Systemy telekomunikacyjne, WKiŁ, Warszawa, 1998</p> <p>2. B. P. Lathi, Z. Ding, Modern Digital and Analog Communication Systems, Oxford University Press, 2010</p> <p>3. S. Kula, Systemy teletransmisyjne, WKiŁ, Warszawa, 2004</p>		
Additional bibliography:		
<p>1. S. Haykin, M. Moher, Communication Systems, International Student Version, Wiley, 2010</p> <p>2. T. Anttalainen, Introduction to Telecommunications Network Engineering, Artech House, 1999</p> <p>3. T. Oeberg, Modulation, Detection and Coding, Wiley, 2001</p>		
Result of average student's workload		
Activity	Time (working hours)	
1. participation in laboratory exercises	15	
2. individual work	15	
3. preparation of reports from exercises	15	
Student's workload		
Source of workload	hours	ECTS
Total workload	50	2
Contact hours	15	1
Practical activities	35	1
