| <b>Odpowiedzialny za przedmiot / wykładowca:</b> prof. dr hab. inż. Krzysztof Wesołowski<br>email: wesolows@et.put.poznan.pl<br>tel. 0616653812<br>Faculty of Electronics and Telecommunications<br>ul. Piastowa 3A 60-965 Poznań   |                              |  |
| <b>Odpowiedzialny za przedmiot / wykładowca:</b> prof. dr hab. inż. Krzysztof Wesołowski<br>email: wesolows@et.put.poznan.pl<br>tel. 0616653812<br>Faculty of Electronics and Telecommunications<br>ul. Piastowa 3A 60-965 Poznań   |                              |  |
| <b>Wymagania wstępne w zakresie wiedzy, umiejętności, kompetencji społecznych:</b>  |                              |  |
| 1   | <b>Wiedza:</b>               | Knows the principle of operation of digital transmission systems, including baseband transmission, digital modulations, signal transmission in channels, signal reception, forming the spectral properties of signals, countering channel distortions [K1_W15]<br><br>Has a detailed, systematic knowledge, together with necessary mathematical background, of the fundamentals of the telecommunication theory, which is necessary to understand, analyze and evaluate the operation of analogue and digital telecommunications systems. [K1_W17]<br><br>Knows about development trends in electronics and telecommunication. [K1_W24] |
| 2   | <b>Umiejętności:</b>         | Is able to determine basic parameters and properties of signals and telecommunication systems, under predefined constraints. [K1_U15]<br><br>Is able to evaluate the parameters describing digital signals transmission quality in various communication channels. Is able to match digital signal reception methods to transmission parameters and distortions introduced by the channel. [K1_U19]  |
| 3   | <b>Kompetencje społeczne</b> | Is aware of the main challenges facing electronics and telecommunication in the 21st century.<br>Is aware of the impact electronics and ICT systems and networks will have on the development of the information society. [K1_K04]   |
| <b>Cel przedmiotu:</b><br>Learning methods and standards of digital transmission in fixed links, especially technology of wireline access to fixed networks.  |                              |  |
| <b>Efekty kształcenia i odniesienie do kierunkowych efektów kształcenia</b>   |                              |  |
| <b>Wiedza:</b>  |                              |  |
| 1. Has a systematic, detailed knowledge, together with necessary mathematical background, of advanced methods of digital signal processing in transmission systems used in fixed networks. - [K2_W09]<br>2. Has a wide, systematic knowledge, with necessary mathematical background, of ICT networks and signal transmission methods used in fixed access systems. - [K2_W13]<br>3. Has a systematic knowledge, together with necessary theoretical background, of optoelectronics and fiber optics technology; understands the operation of advanced fiber optic telecommunication systems used in FTTH systems. - [K2_W08] |                              |  |
| <b>Umiejętności:</b>  |                              |  |
| 1. Knows the rules of operation of Polish and international standardization bodies in the area of access systems and networks - [K2_W08]<br>2. Is able to design, construct, program and test complex, technologically advanced electronic circuits and systems, especially for needs of devices and systems operating for fixed access to communication networks - [K2_U15]  |                              |  |

**Kompetencje społeczne:**

1. Understands the legal framework of Polish and international standards in wireline access systems to fixed networks - [K2\_K03]
2. Demonstrates responsibility for designed wireline access systems. Is aware of the hazards they pose for individuals and communities if they are improperly designed or produced . - [K2\_K06]

**Sposoby sprawdzenia efektów kształcenia**

Examination from the contents of the course, reports on the performed lab experiments, credits from the excercise classes

**Treści programowe**

Recalling the rules of baseband and passband digital transmission, including multitone transmission. Symmetric transmission links. Wireline subscriber loops. Duplex transmission methods (TDD, FDD, EC - Echo cancellation). Operation of echo canceller. Digital trabsmission in a subscriber loop: basic access ISDN, HDSL loop, ADSL and VDSL technolgies and their variations. Information on FTTH technology - subscriber loop based on optical fiber technology

**Literatura podstawowa:**

1. W. Y. Chen, DSL Simulation Techniques and Standards. Development for Digital Subscriber Line Systems, Macmillan, 1998

**Literatura uzupełniająca:**

1. J. Griffiths, ISDN Explained, Wiley, Chichester, 1990

**Bilans nakładu pracy przeciętnego studenta**

| Czynność                                      | Czas (godz.) |
|---|--------------|
| 1. Participation in lectures                  | 30           |
| 2. Participation in laboratory exercises      | 30           |
| 3. Studies of ETSI standards on ADSL and VDSL | 15           |
| 4. Preparation to problem exercises           | 15           |
| 5. Preparation to the examination             | 20           |
| 6. Preparation to credits in exercises        | 10           |
| 7. Participation in examination               | 2            |
| 8. Consulting with teachers                   | 3            |

**Obciążenie pracą studenta**

| forma aktywności  | godzin | ECTS |
|---|--------|------|
| Łączny nakład pracy                                       | 125    | 5    |
| Zajęcia wymagające bezpośredniego kontaktu z nauczycielem | 65     | 3    |
| Zajęcia o charakterze praktycznym                         | 60     | 2    |
