| 1. Knows risk assessment methods - [K1A_W09]                                                                                                                                                                                                                  |                                                  |                                                |                                                   |                                      |      |  |  |  |
| Skills:                                                                                                                                                                                                                                                       |                                                  |                                                |                                                   |                                      |      |  |  |  |
| 1. When formulating and solving engineering tasks, a student can discern their systemic and non-technical aspects - [K1A_U10]                                                                                                                                 |                                                  |                                                |                                                   |                                      |      |  |  |  |
| 2. Knows safety rules connected with work in an industrial environment - [K1A_U11]                                                                                                                                                                            |                                                  |                                                |                                                   |                                      |      |  |  |  |
|                                                                                                                                                                                                                                                               | Social competencies:                             |                                                |                                                   |                                      |      |  |  |  |
| 1. Understands the need to make progress, gain knowledge and acquire new skills - [K1A_K01]                                                                                                                                                                   |                                                  |                                                |                                                   |                                      |      |  |  |  |
| 2. Understands the influence of engineering activity on an environment - [K1A_K02]                                                                                                                                                                            |                                                  |                                                |                                                   |                                      |      |  |  |  |

# Assessment methods of study outcomes

#### **Faculty of Engineering Management**

Formative assessment:

- a) Classes: current/ongoing evaluation of the tasks
- b) Lectures: evaluations based on questions relating to the presented materials during the current and previous lectures

Collective assessment:

- a) Classes: reports presentation (based on classes);
- b) Lectures: written test (4 open questions presented during the lecture; the final test pass equals at least 3.0

#### **Course description**

Concepts of risk, misfortunes, initiating events, critical events. Classification of threats. Potential threats. Workplace accidents, failures. Threat assessment and inconveniences in a workplace, industry and services. Occupational risk, process risk, environmental risk. Heuristic methods of risk assessment. Risk estimation. Risk assessment by means of matrix, indicative and graphic methods. Delineating safety loss. Multidimensional risk assessment. Assessment of risk acceptability based on probabilistic methods.

## Result of average student's workload

| Activity                        | Time (working hours) |
|---------------------------------|----------------------|
| 1. lecture                      | 15                   |
| 2. classes                      | 30                   |
| 3. consultation with a lecturer | 10                   |

### Student's workload

| Source of workload   | hours | ECTS |  |  |
|----------------------|-------|------|--|--|
| Total workload       | 55    | 3    |  |  |
| Contact hours        | 40    | 2    |  |  |
| Practical activities | 30    | 1    |  |  |
