STUDY MODULE DESCRIPTION FORM						
Name o	f the module/subject	s systems & processes	Code 10111105211011117636			
Field of study			Profile of study	Year /Semester		
l ogi	stics - Part-time	studies - Second-cycle	(general academic, practical)	) 1/1		
Elective	path/specialty	Studies - Occond-cycle	Subject offered in:	Course (compulsory, elective)		
Chain of Delivery Logistics			Polish	obligatory		
Cycle of study:			Form of study (full-time,part-time)			
Second-cycle studies			part-time			
No. of hours				No. of credits		
Lecture: 16 Classes: - Laboratory: 14			Project/seminars:	- 4		
Status of the course in the study program (Basic, major, other)			(university-wide, from another f	field)		
		(brak)	(brak)			
Educati	on areas and fields of sci	ence and art		ECTS distribution (number and %)		
technical sciences				100 4%		
Responsible for subject / lecturer:						
- dr ir	ż. Paweł Pawlewski					
ema	ail: pawel.pawlewski@	put.poznan.pl				
tel.	61 6653413 dziel leżweierii Zerzed:	zonio				
ul. S	Strzelecka 11 60-965 I	Poznań				
Prere	equisites in term	s of knowledge, skills and	d social competencies:			
		Student has knowledge of the us	se in the design of logistics pro	cesses enterprise integration		
1	Knowledge	methods, simulation technology, methods to streamline and improve the process, is aware of the available simulation packages, knows the concepts of verification processes using simulation experiments, has knowledge of the methods and techniques of process				
		Improvement Student is able to assess the level of maturity of the business process, is able to analyze and				
2	Skills	assess the scope and need for t processes and to interpret and v	the use of simulation techniques in the design of logistics verify the results obtained from the simulation process			
3	Social competencies	Student is aware of the consequ responsibility for decisions	ences of their decisions and is	prepared to take on social		
Assumptions and objectives of the course:						
-acquisition of skills and competences in the field of enterprise logistics system design, understanding the basic methods used in the design of logistic systems, business process design and management						
Study outcomes and reference to the educational results for a field of study						
Knov	vledge:					
1. Stuc	lent can identify a spe	cific problem belonging to the area	a of the design of logistics proc	esses - [K2A_W09]		
2. Und	erstanding of process	mapping and process orientation	in logistics - [K2A_W10]			
3. Student knows the systems and their basic functions used in the design process of logistics systems - [K2A_W12]						
4. Student knows the trends in the development of the logistics process simulation tools - [K2A_W16]						
5. Basic knowledge of the life cycle of machinery, socio-technical systems, industrial products - [K2A_W19]						
b. Student knows the basic methods, techniques, depending on the applicable in solving complex engineering tasks in the field of logistics and know how to explain them - IK2A W131						
Skills:						
1. Able to independently develop a given problem in the design of logistics processes - [K2A_U11]						
2. Can design an experiment for the given problem in the field of logistics and related areas, interpret the results and draw conclusions - [K2A U08]						
3. Can design a process to analyze, formulate a research task, propose the use of the latest technological advances and technology for the design - [K2A_U19]						
4. Can design using appropriate methods and techniques of the system and the logistical process - [K2A_U09]						
5. Can formulate and solve problems through multi-disciplinary integration of knowledge in the fields and disciplines used in						
the design of logistic systems - [K2A_U10]						

## Social competencies:

1. Has a sense of responsibility for their own work and the willingness to comply with the rules work in a team and to take responsibility for collaborative tasks - [K2A\_K03]

2. Can see depending on cause and effect in achieving the set goals and achieve graduation importance of alternative or competing tasks - [K2A\_K04]

## Assessment methods of study outcomes

Examination + Credit simulation project performed in the laboratory

## Course description

Logistics-System approach. Design of the logistics system. The methods used in the design of logistic systems. Orientation functional and process in business management. Process approach in logistics. Models and standardization of processes. Process mapping. Designing and implementing process changes. The implementation of the process approach in the company. Forms of organization of the process in the company. Methodology for process management. Attributes (parameters) of the process, measures of process in the context of enterprise logistics system and supply chain processes meters based process management. The life cycle of the process. Execution and financial aspects - management objectives, resource efficiency. Measuring the effectiveness and efficiency. Simulation and optimization.

#### Basic bibliography:

1. Procesy i projekty logistyczne, S. Nowosielski, Uniwersytet Ekonomiczny, Wrocław 2008

2. Reengineering, Reformowanie procesów biznesowych i produkcyjnych w przedsiębiorstwie, L. Pacholski, W. Cempel, P. Pawlewski, Politechnika Poznańska, Poznań 2009

3. Organizacja procesowa, P.Grajewski, PWE, Warszawa 2007

4. Modele referencyjne w zarządzaniu procesami biznesu, Difin, Warszawa 2007

5. Teoria i inżynieria systemów, Cz. Cempel, Instytut Technologii Eksploatacji - PIB/2008

6. Projektowanie Systemów I Procesów Logistycznych, P.Pawlewski, Skrypt (maszynopis) Poznan 2012

## Additional bibliography:

1. Zarządzanie logistyczne, J. Coyle, E. Bard, J. Langley, PWE, 2002

2. Systemy logistyczne, H. C. Pfohl, Wyd. ILiM, Poznań, 2001

3. Wprowadzenie do zarządzania operacjami i łańcuchem dostaw, C.Bozarth, R.B.Handfield, Helion, Gliwice 2007

4. Supply Chain Management An introduction to Logistics, D.Waters, Palgrave Macmilian 2009

# Result of average student's workload

Activity	Time (working hours)			
Student's workload				
Source of workload	hours	ECTS		
Total workload	100	4		
Contact hours	75	3		
Practical activities	30	2
