	STUDY MODULE DESCRIPTION FORM						
Name of the module/subject Tribology				Code 1010614171010610420			
Field of			Profile of study	Year /Semester			
Mechanical Engineering			(general academic, practical (brak)	4/7			
Elective	path/specialty	abialaa ay d Tyaataya	Subject offered in:	Course (compulsory, elective)			
Motor Vehicles and Tractors			Polish Form of study (full-time,part-time)	obligatory			
Cycle of study: First-cycle studies			part-time				
No. of h	ours			No. of credits			
Lectur	e: 18 Classes	s: - Laboratory: -	Project/seminars:	- 2			
Status o		program (Basic, major, other)	(university-wide, from another	field)			
		(brak)		(brak)			
Education	on areas and fields of sci	ence and art		ECTS distribution (number			
				and %)			
_			.				
Kesp	onsible for subj	ect / lecturer:	Responsible for subje	ct / lecturer:			
	dr hab. ing Nadolny		Prof. dr hab. ing Nosal Sta				
	ail: karol.nadolny@put +4861 665 2219	.poznan.pi	email: stanislaw.nosal@pu tel. +4861 647 5852	ıt.poznan.pi			
	ulty of Machines and	Transportation		Faculty of Machines and Transport			
3 Pi	otrowo street, 60-965	Poznan, Poland	3 Piotrowo street, 60-965 l	Poznan, Poland			
Prere	quisites in term	s of knowledge, skills an	d social competencies:				
1	Knowledge	Student has the basic knowledg design.	as the basic knowledge of: physics, chemistry, materials science and machine				
2	Skills	Can integrate information from the different areas of knowledge.					
3	Social competencies	Understanding of the need for lifelong learning.					
Assu	mptions and obj	ectives of the course:					
	standing of phenomen machines.	a and processes of the friction cor	ntact in the aspect of control re	liability and durability kinematic			
	Study outco	mes and reference to the	educational results for	a field of study			
Know	/ledge:						
effects		the tribological processes - frictio dge of how to obtain the fluid fricti 11					
Skills							
	ng wear intensity. Kno	ng conditions of friction pair a stud ws how to select materials for par					
	 al competencies:						
Understands the effects of degradation occurring during the operation of machinery. Recognizes the importance of the depletion potential operating machines and the importance of this fact in the economic and environmental aspects [K1A_K01]							

	Assessment methods of study outcomes			
credit on the basis of a written test and exam				
	Course description			

Faculty of Working Machines and Transportation

History development of tribology. Pin actual solids important parameters of inequality area. Nominal area, surface contour, the actual contact area. Adsorption, adhesion and friction in the process of diffusion. Definition, structure and importance of the surface layer for tribological processes. Friction processes-basic concepts, important parameters, classical laws of friction. Theories of dry sliding friction. Special cases of friction: in vacuum, friction non-metallic, friction polymers, composites, layered materials - graphite, MoS2. Friction on ice and snow, at very high speeds and temperatures. Rolling friction. Lubrication - the objectives, the means by which fluid friction: Hydrostatic lubrication, Hydrodynamic (HD), elastohydrodynamic (EHD), magneto-hydrodynamic lubrication (MHD). Limits boundaries the effectiveness of lubrication. Tribological wear - measure the time course, reaching out, the classification of wear. Abrasive wear. Hypotheses tack adhesive. Tribochemical wear. Aadhesive scuffing, fretting. Fatigue wear (Peeling, pitting, peeling). Wear of polymers. Effect of vibration on the tribological processes. Selected problems nanotribologii.

Basic bibliography:

- 1. Nosal S., Tribologia. Wprowadzenie do zagadnień tarcia, zużywania i smarowania, Wydawnictwo Politechniki Poznańskiej, Poznań 2012.
- 2. Hebda M., Procesy tarcia, smarowania i zużywania maszyn, Wydawnictwo ITeE PIB, Warszawa Radom 2007.
- 3. Nadolny K., Tribologia kół zębatych. Zagadnienia trwałości i niezawodności. Biblioteka Problemów Eksploatacji. Wyd. Instytut Technologii Eksploatacji, Radom, 1999r

Additional bibliography:

- 1. Bowden F.P., and Tabor D. The Friction and Lubrication of Solid, Part II. Clarendon Press, Oxford 1964
- 2. Dowson D., History of Tribology. Longman, New York 1979.
- 3. Barwell F. T., Łożyskowanie, WNT, Warszawa 1984.

Result of average student's workload

Activity	Time (working hours)
1. Participation in the lecture	30
2. Consultation	2
3. Exam Preparation Exam Preparation	15
4. Participation in the exam	2

Student's workload

Source of workload	hours	ECTS
Total workload	49	2
Contact hours	34	1
