STUDY MODULE DESCRIPTION FORM								
Name of the module/subject Exploitation of Technical Means of Transport					Code 1010621251010610			
Field of	study			Profile of study (general academic, practical	١	Year /Semester		
Trar	sport			(brak)	,	3/5		
Elective path/specialty				Subject offered in:		Course (compulsory, elective)		
Ecology of Transport				Polish		obligatory		
Cycle o	f study:		Form	n of study (full-time,part-time)				
First-cycle studies				full-time				
No. of I						No. of credits		
Lectu	0.0000			Project/seminars:	-	2		
Status	•	program (Basic, major, other) (brak)	(ι	university-wide, from another	- '			
Educat	ion areas and fields of sci	` '			(br	ECTS distribution (number		
Luucai	ion areas and heids or so	ence and art				and %)		
technical sciences						2 100%		
Responsible for subject / lecturer: dr inż. Michał Libera email: michal.libera@put.poznan.pl tel. +4861 665-2223 Wydział Maszyn Roboczych i Transportu ul. Piotrowo 3 60-965 Poznań								
Prerequisites in terms of knowledge, skills and social competencies:								
1	Knowledge		dge of the means of transport and operation of their sowledge of statistics and reliability of technical objects.					
2	Skills	The student is able to analyze a justify opinions	and synthesize information, draw conclusions, formulate and					
3	Social competencies	The student is aware of the impo	portance of maintenance and service in the life cycle of the					
Assı	imptions and obj	ectives of the course:						
Acquir	ing the ability to formu	late and solve simple problems of	f oper	ation (operation and mair	itena	ance) means of transport		
Study outcomes and reference to the educational results for a field of study								
Knov	vledge:							
1. He	knows the concept of e	exploitation, maintenance, operation	ion, fa	ilure, durability, reliability,	limi	t state - [K1A_W22]		
2. He knows the typical patterns of changes in the technical state - [K1A_W22]								
3. He knows the issues of unfitness functional and error handling - [K1A_W15]								
4. It has a basic knowledge of handling the operational and correction, periodic reviews and testing of State - [K1A_W15]								
5. Knows basic strategies of technical services, operating schedules, operating levels - [K1A_W15]								
Skills:								
1. He can create a statistical description of the state changes in the operational - [K1A_U18] 2. He can analyze the data assuming the Weibull distribution (graphical method and analytical) - [K1A_U18]								
3. He can identify the types, causes and consequences of failures - [K1A_U01]								
	al competencies:			[00.]				
	•		of mea	ans of transport in the asp	ects	: technical, security.		
1. The student is aware of the importance of the rational use of means of transport in the aspects: technical, security, economic and ecological - [K1A _K02]								

Faculty of Working Machines and Transportation

The audit work, which allow the assessment of the skills acquired by the student in the analysis of operational data.

Test and personal interview, the essence of which is to check the understanding of the substance of the issues the technical operation of the means of transport as described in the contents of the program.

Course description

1) Operation Support

Technical state: the parameter value - tolerance, load - bearing capacity, quality - standard (reference). The useful life between the damage.

2) Changes in the state of technical

Typical waveforms changes . Technical criteria for the technical condition

3) Statistical description of changes in the operational

Numerical characteristics of the random variable . Functional characterization of the random variable

4) Evaluation of the potential equipment and process

Determination of the tolerance limits . Random changes in load and capacity. Factor of safety and security of supply

5) Analysis of data

Analysis of the data assuming the Weibull distribution (graphical method and analytical method) . Evaluation of an average period between damage and preparedness

6) Analysis of the types, causes and consequences of disablement

Unfitness functional. Errors use

7) Handling

Handling operational and correction . Periodic reviews and audits of state. The technical services : Strategies for handling, operating schedules , operating levels

Result of average student's workload

Activity	Time (working hours)				
1. Participation in lectures and exercises	30				
2. Temember the content of the courses	8				
3. Consultation	2				
4. Exam Preparation	7				
5. Participation in the exam	3				

Student's workload

Source of workload	hours	ECTS					
Total workload	50	2					
Contact hours	35	1					
Practical activities	0	0
