<b>Prerequisites in terms of knowledge, skills and social competencies:</b>		
1	<b>Knowledge</b>	Student has a basic knowledge of the structure of transport equipment and in the field of technical operation.
2	<b>Skills</b>	Student is able to analyze and synthesize information, draw conclusions, formulate and justify opinions
3	<b>Social competencies</b>	Student is aware of the importance of rational use of means of transport in terms of technical, economic and environmental
<b>Assumptions and objectives of the course:</b> Develop the ability to formulate and solve problems in operation and maintenance of transport equipment.		
<b>Study outcomes and reference to the educational results for a field of study</b>		
<b>Knowledge:</b>		
1. Student knows the terminology in the field of operation and maintenance - [-] 2. Student knows a elementary operation models and vehicle service strategies as well as ways to provide for spare parts - [-] 3. Student knows how to evaluate the effectiveness of operation and maintenance - [-] 4. Student understands the impact of operation and maintenance on technical state of the vehicle - [-]		
<b>Skills:</b>		
1. Student is able to design, adapt and reorganize the simple operation and maintenance systems (selecting the correct model and strategy of the organization use vehicles). - [-] 2. Student is able to manage a fleet of transport and to respond in the event of problems in the organization of the operation or maintenance. - [-] 3. Student is able to perform or check a simple maintenance operations and repair - [-]		
<b>Social competencies:</b>		
1. Understands the need and knows the possibilities of lifelong learning, knows the need for acquiring new knowledge for professional development. - [K1A_K01] 2. Is able to identify and resolve the dilemmas associated with the profession, among others. problems at the technology/environment level. - [K1A_K06]		
<b>Assessment methods of study outcomes</b>		

Lectures: test and personal interview, the essence of which is to check the understanding of issues of operation and maintenance.		
Lab: Monitoring of prepare students for laboratory classes and the implementation of the report.		
<b>Course description</b>		
The problem groups in the theory of operation and maintenance. The objectives and stages of research in operation and maintenance of vehicles. Destructive processes occurring at the vehicles. Factors affecting the condition of the vehicle. Models use of means of transport. The use of means of transport. Service of means of transport.
