Assumptions and objectives of the course: To develop the knowledge in english to a higher level, for which the foundation is specialized vocabulary in technical field.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Has knowledge about safety and ergonomics in the design and operation of machines and the threats that machines pose to the environment - [K2A_W08]		
2. Has in-depth knowledge of the construction and principles of operation and the classification of machines from the selected group - [K2A_W18]		
Skills:		
1. He can freely use the international language in contacts with professionals from their field of study - [K2A_U01]		
2. Is able to write in a foreign language to develop technical - scientific scope of the chosen field of study based on the literature and other sources of information and present its oral presentation - [K2A_U02]		
Social competencies:		
1. He can think and act in a creative and enterprising way - [K2A_K05]		
2. Is aware of and understands the validity of the non-technical aspects and effects of engineering activities, including its impact on the environment and the associated responsibility for decisions - [K2A_K02]		
3. Is able to set priorities for implementation specified by you or other tasks - [K1A_K04]		
Assessment methods of study outcomes		
Oral and written exam		

Course description		
Work with the literature in the field of aviation. Working with text, analysis of records of correspondence air discussion with the technical terms.		
Basic bibliography:		
Additional bibliography:		
Result of average student's workload		
Activity	Time (working hours)	
1. Participation in excersises	15	
2. Preparation for the exam	10	
3. Participation in the exam	3	
4. Office hours	2	
Student's workload		
Source of workload	hours	ECTS
Total workload	30	1
Contact hours	20	1
Practical activities	0	0
