Classes:

Status of the course in the study program (Basic, major, other)

15 Laboratory:

	inż. Ewa Oleszkiewicz	
	nail: ewa.oleszkiewicz@ I. 616652107	⊉put.poznan.pl
	aculty of Civil and Enviro	onmental Engineering
	. Piotrowo 5 60-965 Poz	
Prei	requisites in term	s of knowledge, skills and social competencies:
1	Knowledge	Basis of strengths of materials, mechanics of building, theory of elasticity, numerical met and mathematics.
2	Skills	Student can determine stresses and strains in any structural members.
3	Social competencies	The student is aware of the responsibility that lies with the person conducting the structucalculations.
Ass	umptions and obj	inctives of the course:
	•	
comp	main aim of this course butation. Also focusing o	is to provide students with basic analytical and numerical methods of plates and shells on design and practical problems of these types of constructions is the scope. Systematising on of exercises will help in making easy and proper design decisions in the students' future.
comp	main aim of this course outation. Also focusing cas and individual realizationeering practice.	is to provide students with basic analytical and numerical methods of plates and shells on design and practical problems of these types of constructions is the scope. Systematisir

STUDY MODULE DESCRIPTION FORM

Profile of study

Subject offered in:

Form of study (full-time,part-time)

Project/seminars:

(brak)

(general academic, practical)

Polish

(university-wide, from another field)

full-time

(brak)

and %)

Faculty of Civil and Environmental Engineering

Classes - two tests and two projects.

Lectures - one test.

Course description

Lectures

- 1. Preliminary Information, Assumptions and Problems Appearing in Plates and Shells
- 2. Bending of Long Rectangular Plates to a Cylindrical Surface
- 3. Pure Bending of Plates
- 4. Different Tapes of Load of Simply Supported Rectangular Plates
- 5. Symmetrical Bending of Circular Plates
- 6. Small Deflections of Laterally Loaded Plates
- 7. Continuous Rectangular Plates and Plates Resting on Elastic Foundation
- 8. Bending of Plates under the Combined Action of Lateral Loads and Forces in the Middle Plane of the Plate And Large Deflections of Plates
- 9. Plates of Various Shapes
- 10. Numerical Analysis of Strength of a Rectangular Plate
- 11. Deformation of Shells without Bending
- 12. General Theory of Cylindrical Shells
- 13. Shells Having the Form of a Surface of Revolution
- 14. Application of Numerical Methods in Shells
- 15. General Remarks on the Multilayered Plates and Shells

Example classes

- 1. Repetition of Mathematical and Mechanical bases
- 2. Solving Examples of Plates
- 3. Discussion on Individual Projects
- 4. First Test
- 5. Solving Example of Shells
- 6. Discussion on Individual Projects
- 7. Second Test

Basic bibliography:

Additional bibliography:

Result of average student's workload

Activity	Time (working hours)
1. Lectures	30
2. Example classes	15
3. Preparation for classes	10
4. Preparation of homework assignments	10
5. Literature studies	15
6. Consultation	5

Student's workload

Source of workload	hours	ECTS
Total workload	75	3
Contact hours	50	2
Practical activities	35	1
