

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Environmental Management		Code 1010134291010130295
Field of study Environmental Engineering Extramural First-	Profile of study (general academic, practical) (brak)	Year /Semester 5 / 9
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) part-time	
No. of hours Lecture: 20 Classes: - Laboratory: - Project/seminars: -		No. of credits 2
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 2 100% 2 100%
Responsible for subject / lecturer: dr inż. Łukasz Amanowicz email: lukasz.amanowicz@put.poznan.pl tel. 61-665-2534 Faculty of Civil and Environmental Engineering ul. Piotrowo 5 60-965 Poznań		Responsible for subject / lecturer: dr hab. inż. Zbigniew Bagiński email: zbigniew.baginski@put.poznan.pl tel. 61-665-2524 Faculty of Civil and Environmental Engineering ul. Piotrowo 5 60-965 Poznań
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Fundamentals of environmental engineering. Basics of civil engineering. Basics of thermodynamics.
2	Skills	Understanding the principles of sustainable development
3	Social competencies	Awareness of continuous replenishment of knowledge and skills
Assumptions and objectives of the course: Transfer of basic knowledge in the field of environmental management in accordance with the principle of sustainable development, taking into account the principles of integrated environmental protection in the company and eco-energy analysis of the product in the Whole Life Cycle (LCA).		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. The student knows and understands the modern models and strategies for environmental management - [K_W08] 2. The student knows the principles of eco-management EMAS and ISO 14001 across the enterprise - [K_W09] 3. The student knows the principles of analysis of the product in the whole life cycle (LCA) - [K_W06, K_W09] 4. The student has a knowledge of the practical application of legislation in the field of environmental management - [K_W08]		
Skills:		
1. The student is able to practice modern environmental management strategies - [K_U10] 2. The student is able to take into account the principles of the strategy of Cleaner Production in the design of systems - [K_U12] 3. The student is able to define the objectives, tasks and environmental policy in the functioning of the company - [K_U10, K_U11] 4. The student can take into account the principles of LCA in the process of evaluating energy and environmental product - [K_U12, K_U15]]		
Social competencies:		

1. Student deeper realizes the essence of the principles of sustainable development in the functioning of society - [K_K02, K_K05]
 2. Student recognizes the need for systematic deepening and extending their competencies - [K_K01]

Assessment methods of study outcomes

Four homeworks performed (and defended) individually by the student. Final evaluation - as the average of the ratings for the homeworks.

Course description

- The concept of sustainable development
- Models of environmental policy implementation
- Cleaner Production Strategy and tools for its implementation
- The principle of BAT; Basic criteria for BAT
- The principle of integrated environmental protection in accordance with the IPPC Directive
- Analysis of the energy and ecological product in the full life cycle (LCA) - methodology
- Model environmental management system of the organization according to ISO 14001, the basic principles of ISO 14001, procedures
- Environmental Management System EMAS
- Principles of emissions trading and their implementation in EU
- Environmental Protection Law. Basic principle II National Environmental Policy
- Report on the impact of the project on the environment: obligatory and alternative scope of the report
- Permits for the introduction of pollutants into the environment, the scope of application
- Integrated permits - which relate to the installation procedure, the content of an application for an integrated permit
- Emission standards and imisyjne - rules

Basic bibliography:

1. Górzyński J.: Podstawy analizy środowiskowej wyrobów i obiektów, WNT, Warszawa 2007
2. Nowak Z. (red): Zarządzanie środowiskowe, Cz. I, II, Wyd. Politechniki Śląskiej, Gliwice, 2001
3. Ekozarządzanie w przedsiębiorstwie, Centrum informacji o Środowisku, Warszawa, 2010
4. Norma ISO 14001
5. Normy ISO 14041 i kolejne
6. www.mos.gov.pl

Additional bibliography:

1. Prawo ochrony środowiska, wraz ze zmianami
2. Rozporządzenia z zakresu ochrony środowiska

Result of average student's workload

Activity	Time (working hours)
1. Participation in lectures	20
2. Consultation	3
3. Homework and its defense	22

Student's workload

Source of workload	hours	ECTS
Total workload	45	2
Contact hours	25	1
Practical activities	15	1
