

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Mathematics		Code 1010324311010340025
Field of study Electrical Engineering	Profile of study (general academic, practical) general academic	Year /Semester 1 / 1
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) part-time	
No. of hours Lecture: 30 Classes: 26 Laboratory: - Project/seminars: -		No. of credits 5
Status of the course in the study program (Basic, major, other) basic		(university-wide, from another field) university-wide
Education areas and fields of science and art the sciences		ECTS distribution (number and %) 5 100%
Responsible for subject / lecturer: dr Alina Gleska email: alina.gleska@put.poznan.pl tel. 616652330 Faculty of Electrical Engineering ul. Piotrowo 3A 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Basic knowledge of elementary functions, algebraic operations, analytical geometry, trigonometry and mathematical analysis.
2	Skills	Students should be able to solve simple rational equations and inequalities, to give domains of elementary functions and to know their curves.
3	Social competencies	Students seriously treat the process of studying.
Assumptions and objectives of the course: The aim of subject is introduction to complex numbers and their some practical applications. Differential and integral calculus of one variable are presented together with their applications in mathematics and physics. The foundations of linear algebra like matrix calculus (with determinants) and solving of systems of algebraic linear equations are studied.		
Study outcomes and reference to the educational results for a field of study		
Knowledge: 1. Students have the knowledge about foundations of linear algebra and complex numbers, which are necessary to describe electrical phenomena. - [K_W01 +++] 2. Students have the knowledge about differential and integral calculus. - [K_W01 +++]		
Skills: 1. Students are able to solve equations with complex coefficients. - [K_U10 +] 2. Students know first derivatives of functions and their geometric interpretations. - [K_U10 +] 3. Students can calculate the integrals of elementary functions and use them in important applications. - [K_U10 +] 4. Students are able to solve systems of algebraic linear equations. - [K_U10 +]		
Social competencies: 1. Students understand the importance of effective using of mathematics in other areas of science. - [K_K01 +]		
Assessment methods of study outcomes		
Lecture ? written final test. Short tests during the term (50%) and final test at the end of the term (50%) (additional points for activity)		
Course description		

Applied methods of teaching: lectures on the blackboard; tutorials - solving problems on the blackboard and discussing solutions.

The elements of mathematical logics. Complex numbers in algebraic, trigonometric and exponential forms. Operations on complex numbers. Solving systems with complex coefficients. The concept of limits of real numbers sequences. The investigation of monotonicity and boundedness of sequences, the setting of their limits. Euler constant. The concept of functions: domains, qualitative properties, the review of elementary functions, the concept of limits and continuity of functions. The differential calculus of functions of one variable: the derivative and its applications, the intermediate value theorems for derivatives, the L'Hospital's rule. The integral calculus: the Riemann integral of a bounded function on a finite interval $[a,b]$ and its applications. Improper integrals. Matrix calculus: arithmetic operations on matrices, determinants, the inverse of matrix, solving of systems of algebraic linear equations.

UPDATE: 2016/2017

Basic bibliography:

Result of average student's workload

Activity	Time (working hours)
1. Lectures	30
2. Tutorials	26
3. Homeworks preparing for tutorials and exams	40
4. Meetings with the lecturer	4

Student's workload

Source of workload	hours	ECTS
Total workload	100	5
Contact hours	56	3
Practical activities	26	2
