STUDY MODULE DESCRIPTION FORM

Name of the module/subject	Code
Electronics and Power Electronics	**1010321341010323752**

Field of study	Profile of study (general academic, practical)	Year /Semester
Electrical Engineering	**(brak)**	**2 / 4**
Elective path/specialty	Subject offered in:	Course (compulsory, elective)
-	**Polish**	**obligatory**

Cycle of study:	Form of study (full-time,part-time)
First-cycle studies	**full-time**

No. of hours	No. of credits
Lecture: **30** Classes: **-** Laboratory: **30** Project/seminars: **-**	**5**

Status of the course in the study program (Basic, major, other)	(university-wide, from another field)
(brak)	**(brak)**

Education areas and fields of science and art	ECTS distribution (number and %)
technical sciences	**3 60%**
Technical sciences	**2 40%**

Responsible for subject / lecturer:

dr hab. inż. Ryszard Porada, prof. nadzw.
email: ryszard.porada@put.poznan.pl
tel. 48 61 665 2360
Wydział Elektryczny
ul. Piotrowo 3A 60-965 Poznań

Prerequisites in terms of knowledge, skills and social competencies:

1	**Knowledge**	It has basic knowledge from physics, electrical engineering, electronics and mathematical analysis
2	**Skills**	It knows to apply the knowledge from the range of physics, electrical engineering, electronics and mathematical analysis
3	**Social competencies**	There has the consciousness of the necessity of extending of her competences, a readiness to the collection of the cooperation within the framework of the group

Assumptions and objectives of the course:

Theoretical knowledge of propriety and basic characteristics of power electronics converters, rectifiers, AC/AC converters, AC/DC converters and inverters.

Study outcomes and reference to the educational results for a field of study

Knowledge:

1. to apply the knowledge on the subject constructions, operations and designings of power electronics systems in chosen branches of industry - [K_W04 ++ K_W14 +++]
2. to characterize basic criteria of the analysis and synthesis for simple power electronics systems - [K_W04 ++]

Skills:

1. to use the knowledge within the range constructions and mechanisms of action of elements and basic power electronics systems - [K_U03 ++]
2. o use known methods and mathematical models and computer simulations to the analysis and evaluation of elements operation and power electronics systems - [K_U02 ++ K_U11 ++]

Social competencies:

1. Has the consciousness of the importance and the understands different aspects and results of activity of electrician engineer in this of the influence on the medium, and related to this of the responsibility for undertaken decisions - [K_K01 ++]

Assessment methods of study outcomes

Lecture

? the credit of the lecture preceded with the credit of occupations laboratory exercises and project,

Designing work and laboratory exercises:

? the test and awarding the knowledge of need-to-know to realization of placed problems

in the given area of tasks,

? verification skills on every exercises

? evaluation of the knowledge and skills related to the realization of laboratory exercise, the evaluation of the report from done exercises.

Obtaining additional points for activity during exercises, in particular way for:

? proposing to discuss additional aspects of the subject

? effective use of knowledge obtained during solving of given problem;

? comments related to improve teaching material,

? aesthetics of solved problems and reports ? within homework.

Course description

The power electronics ? targets and assignments, general characterization of the object. Semiconductor elements in the power electronics. Types of power electronics systems, the classification and basic functions. AC/DC converters ? non-controlled and controlled rectifiers. AC/AC systems - alternating voltage controllers. DC/DC converters ? DC voltage controller (thyristor and transistor). DC/AC converters ? independent transistor inverters ? systems and methods of controlled. Chosen problems of the compatibility of power electronics systems

Result of average student's workload

Activity	Time (working hours)
1. participation in the lectures	30
2. participation in the laboratory exercises	30
3. participation in consultations on the lecture	10
4. participation in consultations on the laboratory exercises	10
5. preparation for the laboratory exercises	15
6. preparation for the exam	20
7. preparation for the laboratory exercises pass	10
8. participation in the exam	5

Student's workload

Source of workload	hours	ECTS
Total workload	130	5
Contact hours	70	3
Practical activities	30	2
