		STUDY MODULE D	ESCRIPTION	FORM	
	f the module/subject ods of digital co	ontrol		со 10	de 10311371010326008
Field of		a	Profile of study (general acade	mic, practical)	Year /Semester
	trical Engineerin	9	(brak) Subject offered	in [.]	4/7 Course (compulsory, elective)
LICOUVE		sor's Control Systems in		lish	obligatory
Cycle of	f study:	-	Form of study (full-tin	me,part-time)	
	First-cyc	cle studies		full-tim	e
No. of h	ours				No. of credits
Lectur	Classes		Project/semir	nars: 15	5
Status o		program (Basic, major, other)	(university-wide, f		
		(brak)		na)	ak)
Educati	on areas and fields of sci	ence and art			ECTS distribution (number and %)
techr	nical sciences				5 100%
	Technical scie	ences			5 100%
Resp	onsible for subj	ect / lecturer:			1
dr h	ab. inż. Ryszard Pora	da, prof. nadzw.			
ema	ail: ryszard.porada@p				
	48 61 665 2360 dział Elektryczny				
	Piotrowo 3A 60-965 Po	oznań			
Prere	quisites in term	s of knowledge, skills an	d social comp	etencies:	
1	Knowledge	It has basic knowledge from the	range of the autom	ated technolog	у.
2	Skills	It knows to use basic knowledge	from the range of	the automated t	echnology.
3	Social competencies	It can think and work enterprisingly in the area of the designing of industrial automated technology			
Assu	mptions and obj	ectives of the course:			
Master	of tools of analysis ar	nd synthesis digital control system	S.		
	Study outco	mes and reference to the	educational re	sults for a	field of study
Knov	/ledge:				
	escripction principle of 4+ K_W22+++]	action and apply tools of analyse	s and synthesis of o	digital control sy	vstems on basic level -
Skills					
1. to a	oply the knowledge of	within the range digital control sys	tems for determine	ed uses - [K_U)3 ++ K_U17 ++]
Socia	al competencies:				
	n think and work enter is - [K_K02 ++]	rprisingly in the area of the design	ng of the industrial	automated tech	nnology and digital control

Assessment methods of study outcomes

? the credit of the lecture preceded with the credit of occupations laboratory exercise	ses and project,				
Designing work and laboratory exercises:					
the test and awarding the knowledge of need-to-know to realization of placed pro	oblems				
n the given area of tasks,					
? verification skills on every exercises					
evaluation of the knowledge and skills related to the realization of laboratory exe from done exercises.	rcise, the evaluation of the report				
Obtaining additional points for activity during exercises, in particular way for:					
Proposing to discuss additional aspects of the subject					
effective use of knowledge obtained during solving of given problem;					
? comments related to improve teaching material,					
? aesthetics of solved problems and reports ? within homework.					
Course description					
Characterization of the digital control. Classical linear models (SISO, MIMO). Methods of the differential equations. The selection of the sampling interval. Linear regulators? digital impregulators. Methods of designings of algorithms? selection of parameters of digital regulators. Realization of digital control in distributed systems. Compensation of delays in distributed components.	lementation of continuous ors. Nonlinear regulators.
