

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Mathematical modelling of power engineering installations		Code 1010312411010325648
Field of study Power Engineering	Profile of study (general academic, practical) (brak)	Year /Semester 1 / 1
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: Second-cycle studies	Form of study (full-time, part-time) full-time	
No. of hours Lecture: 15 Classes: - Laboratory: 15 Project/seminars: -		No. of credits 2
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 2 100% 2 100%
Responsible for subject / lecturer: Dr inż. Arkadiusz Dobrzycki email: arkadiusz.dobrzycki@put.poznan.pl tel. 616652685 Elektryczny ul. Piotrowo 3A, 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Basic knowledge of electrical engineering, power engineering.
2	Skills	Ability to use a spreadsheet. Ability to effectively self-education in a field related to the chosen field of study.
3	Social competencies	Is aware of the need to broaden their competence, willingness to work together as a team.
Assumptions and objectives of the course: Knowledge of the principles of construction, modeling, calculation, design and operation of electrical systems and networks.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. It has a basic and systematic knowledge of construction, design and operation of electrical systems and networks - [K_W04+++, K_W14+]		
2. He knows the method that calculates the demand for electric power and energy, and versed in the means of providing electricity use bezpieczeństwo - [K_W15+]		
Skills:		
1. It can analyze the work of the electrical components in steady states - [KU_07+++, KU_10+]		
2. He can use the known methods for calculating the load forecasting installation or network. ieci elektroenergetycznej z wykorzystaniem istniejącego oprogramowania komputerowego - [KU_07+++, KU_08++]		
Social competencies:		
1. Is aware of the responsibility of a power engineer in particular the need for a proper analysis of the operating status of the power system components on the reliability of electricity supply. - [K_K02+]		
Assessment methods of study outcomes		

<p>Lecture: ? assess the knowledge and skills listed on the written exam, ? continuous evaluation for each course (rewarding activity and quality perception).</p> <p>Laboratory: ? rewarding the knowledge necessary for the accomplishment of problems in the area of laboratory tasks, ? continuous evaluation for each course - rewarding gain skills they met the principles and methods ? assessment of knowledge and skills related to the implementation of the tasks your practice, including an assessment report on the performed exercise.</p> <p>Get extra points for the activity in the classroom, and in particular for: ? propose to discuss further aspects of the subject; ? the effectiveness of the application of the knowledge gained during solving the given problem.</p>		
Course description		
<p>Classification and construction of electrical systems and networks, the study of their components, the analysis of the phenomena occurring in them and their mathematical models. Protection that provides security, protection against electric power installations.</p>		
Basic bibliography:		
<p>1. Musiał E. &#38;#34;Instalacje i urządzenia elektroenergetyczne&#38;#34;, WSiP, Warszawa 1998. 2. Markiewicz H. &#38;#34;Instalacje elektryczne&#38;#34;, WNT, Warszawa,2000. 3. Lejdy B. &#38;#34;Instalacje elektryczne w obiektach budowlanych&#38;#34;, WNT, Warszawa 2003. 4. Marzecki J. &#38;#34;Miejskie sieci elektroenergetyczne&#38;#34;, Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa 1996. 5. Strojny J., Strzałka J. &#38;#34;Zbiór zadań z sieci elektrycznych&#38;#34;, Uczelniane Wydawnictwa Naukowo-Dydaktyczne AGH, Kraków 2000.</p>		
Additional bibliography:

Result of average student's workload		
Activity	Time (working hours)	
1. participation in lectures	15	
2. participation in laboratory classes	15	
3. participate into consultations concerning the lecture	2	
4. participate into consultations concerning the laboratory classes	2	
5. Preparation of laboratory reports	10	
6. prepare for the exam	10	
7. participation in the exam	2	
Student's workload		
Source of workload	hours	ECTS
Total workload	56	2
Contact hours	36	1
Practical activities	27	1
