

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Exploitation of electrical systems with RES		Code 1010311471010328882
Field of study Power Engineering	Profile of study (general academic, practical) (brak)	Year /Semester 4 / 7
Elective path/specialty Ecological Source of Electrical Energy	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) full-time	
No. of hours Lecture: 15 Classes: 15 Laboratory: - Project/seminars: -		No. of credits 3
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 3 100% 3 100%
Responsible for subject / lecturer: Dr inż. Arkadiusz Dobrzycki email: arkadiusz.dobrzycki@put.poznan.pl tel. 616652685 Elektryczny ul. Piotrowo 3A, 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Basic knowledge of physics, chemistry, electrical engineering, power engineering, and construction and operation of common environmental sources of electricity.
2	Skills	Spreadsheet service. Ability to effectively self-study in a field related to the chosen field of study.
3	Social competencies	Is aware of the need to broaden their competence, willingness to work together as a team.
Assumptions and objectives of the course: Acquainted with the properties and characteristics of the typical electricity green energy sources and the principles of their operation.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Has a basic and systematic knowledge of the construction and connection to the power system typical of organic sources of electricity. - [K_W11+]		
2. Knows design methodologies and operating systems and networks with common environmental sources of electricity - [K_W12+++]		
Skills:		
1. It can compare different variants of the concept of the construction and the installation of electricity supplied from the typical ecological sources of electricity. - [KU_07+,KU_11+]		
Social competencies:		
1. Is aware of the need to behave in a professional manner, and in particular the impact of energy engineer for safe operation of typical green sources of electricity and the electricity grid. - [K_K03+]		
Assessment methods of study outcomes		

<p>Lecture</p> <ul style="list-style-type: none"> - Assess the knowledge and skills listed on the exam grading, - Continuous evaluation for each course (rewarding activity and quality perception). <p>Embedded classes:</p> <ul style="list-style-type: none"> - Final exam on topics related to plant and grid system for renewable electricity - Assessment of active participation in class <p>Get extra points for the activity in the classroom, and in particular for:</p> <ul style="list-style-type: none"> - To propose additional issues to discuss issues; - The effectiveness of the application of the knowledge gained during solving the given problem. 		
Course description		
<p>General principles of operation of electrical equipment. Qualification requirements for persons involved in the operation of power equipment. Technical and operational documentation and operating instructions. Taking the life of electrical equipment, its operation and control. The organization and execution of work on equipment, plants and distribution systems of electric cleaner energy sources. The command to perform the work. Preparation jobs, admission to work, quit. Principles of safe for work. Protective equipment and tools.</p>

Result of average student's workload		
Activity	Time (working hours)	
1. participation in lectures	15	
2. participation in auditory classes	15	
3. participate into consultations concerning the lecture	3	
4. participate into consultations concerning the auditory classes	3	
5. prepare for the completion of the lecture	15	
6. prepare for the completion of the auditory classes	15	
7. participation in the completion of the auditory classes	2	
8. participation in the completion of the lecture	2	
Student's workload		
Source of workload	hours	ECTS
Total workload	70	3
Contact hours	40	2
Practical activities	0	0
