		STUDY MODULE DE	SCRIPTION I	ORM			
	f the module/subject Jpational Health	and Safety (OHS)	Code 1011105221011126439				
Field of Safe		Part-time studies - Second		(general academic, practical)			
Elective path/specialty			Subject offered in	ו:	Course (compulsory, elective)		
Ergonomics and Work Safety			Poli	sh	elective		
Cycle of	study:		Form of study (full-time	e,part-time)			
	Second-cy	cle studies	part-time				
No. of h	ours				No. of credits		
Lectur	e: 8 Classes	s: 10 Laboratory: -	Project/semina	ars: -	3		
Status o	of the course in the study	program (Basic, major, other)	(university-wide, from another field)				
		(brak)		(br	ak)		
Education	on areas and fields of sci	ence and art			ECTS distribution (number and %)		
techr	ical sciences				3 100%		
dr ir ema tel. Fac ul. S	onsible for subje tż. Małgorzata Wejman til: malgorzata.wejmar +48 61 665 3406 ulty of Engineering Ma Strzelecka 11 60-965 F	n i@put.poznan.pl nagement Poznań					
Prere	quisites in term	s of knowledge, skills and	social compe	tencies:			
1	Knowledge	Knowledge The student has knowledge of ergonomics in technology, ecology, basics of diagnosing and ergonomic design as well as occupational.					
2	Skills		nts can interpret relationships occurring in the system of human-technical object, work that causes minimal workload ensures security.				
3	3 Social The student is aware of the social role of a technical college graduate, and of predispositions to apply occupational safety principles.						
Assu	mptions and obj	ectives of the course:					
work of in desig	n human health. Teac gn. The knowledge an	letailed knowledge of the theoretica hing how to prevent the negative co d skills should enable students to in an body and to ensure health.	onsequences of exc	essive worklo	ad. The use of acquired skill		
	Study outco	mes and reference to the e	educational res	sults for a	field of study

Skills							
		comprehends it - [[K2A_U5]]					
	lent can apply informa	tion-communicative techniques to o	leal with tasks that	are typical of	engineering activity		
3. Has	got the preparation th	at is indispensable to be able to wo along with the ability to impose the			nd also knows safety rules		
for Saf	ety Engineering, wile ι	a given specification, design and o using appropriate methods, techniq neering (including some uncommor	ues and tools, as w	ell as solve co	omplex engineering tasks,		
	al competencies:		1	-	. ,11		

1. Understands the need and knows means how to self-study (first, second and third cycle studies, postgraduate studies, qualification courses)- improving professional, personal and social competence; can argument the need to learn for the whole life. - [[K2A_K1]]

2. Student is fully aware of the responsibility that he has taken for his own work and expresses readiness to comply with the rules of team work as well as responsibility for mutually realized and completed tasks. - [[K2A_K3]]

3. Can determine some causal relationships in the process of targets implementation and rank pertinence of alternative or competitive tasks. - [[K2A_K4]]

Assessment methods of study outcomes

-Oral and written exam; evaluation of written assignments presented during classes.

Course description

- The historical development of occupational health.

- Possibilities of human psycho-physical, chemical and biological occupational environment.

-The tolerance limits of the human body: hygienic evaluation of working conditions, occupational diseases and related to his profession.

- Risk factors in the work environment, somatic and psychological reactions of the human body to these risks.

- Fatigue and rest.
- Physiological principles for the organization of shift work.
- Working conditions of women and the elderly.

- Technical and organizational development of the welfare conditions.

- Standards for determining allowable changes in the work environment, ie those that allow the functional balance of the human body.

- The law concerning the health protection of the working man.

Basic bibliography:

1. Koradecka D., (red), Bezpieczeństwo pracy i ergonomia (Occupational safety and ergonomics), Wyd. CIOP, Warszawa 1999

2. Wejman M., Higiena pracy (Work hygiene), Wyd.Politechniki Poznańskiej, Poznań 2012

Additional bibliography:

1. Norms, standards, regulations specified by the lecturer.

Result of average student's workload

Activity	Time (working hours)				
1. Participation in lectures	8				
2. Participation in classes	10				
3. Preparation for classes and report preparation	10				
4. Preparation for oral and written exam	5				
5. Review of exam results	2				
Student's workload					

Source of workload	hours	ECTS
Total workload	35	3
Contact hours	20	1
