

<b>STUDY MODULE DESCRIPTION FORM</b>		
Name of the module/subject <b>Operational Research and Econometrics</b>		Code <b>1011105311011134996</b>
Field of study <b>Engineering Management - Part-time studies -</b>	Profile of study (general academic, practical) <b>general academic</b>	Year /Semester <b>1 / 1</b>
Elective path/specialty <b>Communication Management in</b>	Subject offered in: <b>Polish</b>	Course (compulsory, elective) <b>obligatory</b>
Cycle of study: <b>Second-cycle studies</b>	Form of study (full-time, part-time) <b>part-time</b>	
No. of hours Lecture: <b>16</b> Classes: <b>14</b> Laboratory: <b>-</b> Project/seminars: <b>-</b>		No. of credits <b>3</b>
Status of the course in the study program (Basic, major, other) <b>other</b>		(university-wide, from another field) <b>university-wide</b>
Education areas and fields of science and art <b>social sciences</b>		ECTS distribution (number and %) <b>3 100%</b>
<b>Responsible for subject / lecturer:</b>  dr Tomasz Brzęczek email: tomasz.brzeczek@put.poznan.pl tel. 61 665 33 92 Wydział Inżynierii Zarządzania ul. Strzelecka 11 60-965 Poznań		
<b>Prerequisites in terms of knowledge, skills and social competencies:</b>		
1	<b>Knowledge</b>	Student knows economic terms and management problems, especially operation management problems.
2	<b>Skills</b>	Student has Excel and computer skills. Makes basic operations of matrix algebra.
3	<b>Social competencies</b>	Student works in team.
<b>Assumptions and objectives of the course:</b> To develop skills of input-output modeling in management systems and optimization skills. To deliver knowledge about methods of management optimization and methods of estimation of an econometric model.		
<b>Study outcomes and reference to the educational results for a field of study</b>		
<b>Knowledge:</b>		
1. Student knows typical optimization problems in management, their objectives and constraints. - [K2A_W01] 2. Knows problems of production structure, mixture and scheduling. - [K2A_W09] 3. Knows transport plan problem. - [K2A_W09] 4. Knows optimization methods with continuous and discrete variable. - [K2A_W09] 5. Knows multi criteria optimization methods. - [K2A_W09] 6. Knows ordinary least squares method. - [K2A_W10]		
<b>Skills:</b>		
1. Student builds input-output model of economic system effectiveness. - [K2A_U01] 2. Uses optimization methods: graphical, simplex, graphs and transportation algorithm. - [K2A_U04,] 3. Student estimates or optimizes models with Excel's Solver. - [K2A_U07] 4. Uses multi criteria methods (aims hierarchy, metacriterion, fulfillment degree, AHP). - [K2A_U04] 5. Estimates linear and linearizable econometric models with OLS. - [K2A_U04] 6. Explains results of optimization and econometric models and uses them in management. - [K2A_U02]		
<b>Social competencies:</b>		
1. Student is aware of optimization benefits in management and planning. - [K2A_K03] 2. Spreads optimization in management problem solving. - [K2A_K05] 3. Can objectively assess and analyze data and solutions of management problems. - [S2A_K06]		

<b>Assessment methods of study outcomes</b>		
Partial mark from activity at classes and from solving of tasks.		
Pass mark from lecture and from exercises based on partial marks and results of written test of tasks solving.		
<b>Course description</b>		
1. Estimation of linear and linearizable econometric models with OLS. 2. Clasification and modeling of decision tasks. Problems of production structure, mixture, resource division, transportation. 3. Linear programming. Simplex and graphical method. 4. Multi-criteria continous programming. Metacriterion, objectives hierarchy. 5. Multi-criteria integer programming. Fulfillment degre, AHP. 6. Net programming. CPM ? critical path method. PERT-program evaluation and review technique. 7. Transportat optimization problem and Little algorithm. 8. Decisions under risk. Decision tree and a newsboy problem. DYDACTIC METHODS: lecture with problem analysis, exercises, case study.		
<b>Basic bibliography:</b>		
1. Badania operacyjne, Sikora W. (red.), PWE, Warszawa 2008. 2. Brzęczek T., Gaspars-Wieloch H., Godziszewski B., Podstawy badań operacyjnych i ekonometrii, Wydawnictwo PP, Poznań 2010. 3. Józefowska J., Badania operacyjne i teoria optymalizacji, Wydawnictwo PP, Poznań 2011. 4. Kufel T., Ekonometria. Rozwiązywanie problemów z wykorzystaniem programu GRETTL, WN PWN, Warszawa 2011. 5. Przykłady i zadania z badań operacyjnych i ekonometrii, Sikora W. (red.), Wyd. UEP, seria MD 163, Poznań 2005.		
<b>Additional bibliography:</b>		
1. Anholcer M., Gaspars H., Owczarkowski A., Ekonometria z Excelem Wyd. UEP, Poznań 2010. 2. Ekonometria i badania operacyjne. Zagadnienia podstawowe, Guzik B. (red.), Wydawnictwo Uniwersytetu Ekonomicznego w Poznaniu, Poznań 2003 3. Trzaskalik T., Wprowadzenie do badań operacyjnych z komputerem - CD, PWE, Warszawa 2008. 4. Witkowska D., Podstawy ekonometrii i teorii prognozowania, Oficyna Ekonomiczna, Kraków 2006.		
<b>Result of average student's workload</b>		
<b>Activity</b>	<b>Time (working hours)</b>	
1. Lectures	16	
2. Exercises	14	
3. Consulting	10	
4. Own studies preparing to classes and passes	30	
<b>Student's workload</b>		
<b>Source of workload</b>	<b>hours</b>	<b>ECTS</b>
Total workload	70	3
Contact hours	40	2
Practical activities	14	0
