

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Technical Graphics		Code 1011105311011120135
Field of study Engineering Management - Part-time studies -	Profile of study (general academic, practical) general academic	Year /Semester 1 / 1
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) part-time	
No. of hours Lecture: 12 Classes: - Laboratory: 10 Project/seminars: -		No. of credits 4
Status of the course in the study program (Basic, major, other) other		(university-wide, from another field) university-wide
Education areas and fields of science and art technical sciences		ECTS distribution (number and %) 4 100%
Responsible for subject / lecturer: Dr hab.inż.Józef Gruszka, prof. PP email: email: jozef.gruszka@put.poznan.pl tel. 61 6653375 Faculty of Engineering Management 60-965 Poznań, Strzelecka 11 st.		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Basic knowledge of geometry and drawing from high school.
2	Skills	Efficient drawing. The student can apply typical methods of solving simple problems in the field of Engineering Graphics.
3	Social competencies	Understanding the importance of technical drawing in the work of an engineer.
Assumptions and objectives of the course: -Purpose of the subject: Introduction of the most important information from the field of technical drawing including Polish standards. Familiarization with electrical, architectural and construction drawings and machine construction based on the information from the machine drawing. The ability to read technical drawing.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Has a basic knowledge of: engineering graphics; design, technology, the construction and operation of machinery - [K1A_W05]		
2. Student knows the basic methods, techniques, tools and materials used to solve simple engineering tasks in the field of Engineering Graphics. - [K1A_W24]		
Skills:		
1. . Is able to independently develop the problem that exists within the studied - [K1A_U05]		
2. can conduct a critical analysis of the ways in which technical solutions function and assess, by means o - [K1A_U13]		
3. Student can identify project tasks and solve simple engineering tasks in the field of Engineering Graphics. - [K1A_U17]		
4. The student can apply typical methods of solving simple problems in the field of Engineering Graphics. - [K1A_U18]		
Social competencies:		
1. Is aware of the need for lifelong learning; inspiring and organizing the learning process of other persons within the framework of the studied subject areas - [K1A_K01]		
2. Student is aware of validity and understands non-technical aspects and effects of engineering activities, including the impact on the environment, and connected liability for making decisions - [K1A_K08]		

Assessment methods of study outcomes		
<p>-Formative evaluation: a) Exercise: based on the assessment of the current exercise progress of the technical drawing b) Lecture: based on the answers to questions concerning the material from previous lectures Summary evaluation: a) Exercise: credit in the form of technical drawings from the implemented contents of the program b) Lecture: credit in the form of a selection test</p>		
Course description		
<p>-Program content: The program of subject includes the following topics: types of drawings, sheet formats, standardized technical drawing elements, types and distribution of sections, views and intersections, dimensioning, tolerance of dimensions, shape and position, determination of surface roughness and waviness, connection of machine parts, axles, arbour, bearings, clutches and brakes. Drawing and reading of schemes: mechanical, hydraulic, pneumatic, thermal energy and vacuum technology, electrical drawing elements, chemical and architectural - construction. Drawings: Executives, assemblies, graphs and nomograms. Educational methods: a) Lecture: Monographic lecture using a computer with the division of program content into separate thematic issues in relation to the thematic scope of the exercises. b) Exercise: exercise method with elements of demonstration method and causerie method according to the program content.</p>		
Basic bibliography:		
<ol style="list-style-type: none"> Dobrzański T., Rysunek techniczny maszynowy, Wydawnictwo WNT, Warszawa 2015. Filipowicz K., Kowal A., Kuczaj M., Rysunek techniczny, Wydawnictwo Politechniki Śląskiej, Gliwice 2016. Zakres aktualnych aktów normatywnych z zakresu rysunku technicznego ? wymagania ogólne. 		
Additional bibliography:		
<ol style="list-style-type: none"> Molasy R., Rysunek techniczny: chropowatość i falistość powierzchni, tolerancje geometryczne i tolerowanie wymiarów, Wydawnictwo Politechniki Świętokrzyskiej, Kielce, 2016. 		
Result of average student's workload		
Activity	Time (working hours)	
1. Lecture	12	
2. Laboratory	10	
3. Consultation	10	
4. Preparation for Laboratory	5	
5. Preparation for Lectury	5	
Student's workload		
Source of workload	hours	ECTS
Total workload	42	4
Contact hours	32	3
Practical activities	10	1
