Prere	quisites in term	s of knowledge, skills and	d social competencies	:		
1	Knowledge	The student knows the basic cor	oncepts related to the management of production			
2	Skills	The student has the ability to per production	erceive and interpret the facts taking place in the sphere of			
3	Social competencies	The student understands the res control of production	esponsibility for decisions related to planning and shop floor			
Assu	mptions and obj	ectives of the course:				
plannir		f the issues relevant to the field of rol, and their conditions of use. Re				
produo		mes and reference to the	educational results for	r a fie	eld of study	
Know	/ledge:				-	
1. It ha	s deep knowledge of t	the type of decision making in the	area of planning and production	on cont	rol - [K2A_W01]	
	nas expanded knowled tion area - [K2A_W05	lge of organizational relationships	existing between organization	nal unite	s of the company in	
		f decisions in MPS creation and th	e MRP II planning algorithm -	[K2A	W091	
	•	ge of the mechanisms of production		-	-	
Skills	:					
		al knowledge to describe and anal and choose the critical data and a		on plar	nning system and can	
		yze the causes and course of the formulate simple hypotheses and v		ning sys	stem to formulate their own	
		nplex phenomena involving proces omics and management science d		nning u	ising advanced methods	
4. He has the ability to use the knowledge gained in the field of production planning and control, enhanced by a critical analysis of the effectiveness and suitability of applied knowledge - [K2A_U06]						
5. He h floor co		ropose solutions to the specific pro	bblem of the management in t	he proc	duction planning and shop	
Socia	I competencies:					

1. He has a sense of responsibility for their own work and the willingness to comply with the rules of work in a team and to take responsibility for collaborative tasks - [K2A_K02]

2. He can see cause and effect depending on the system design production planning and shop floor control, and able to prioritize their importance - [K2A_K03]

3. He is aware of the interdisciplinary nature of knowledge of production management and have the skills required to solve complex problems of organization - [K2A_K06]

4. He is aware of the need to choose effective methods of production planning and their impact on competitiveness and entrepreneurship - [K2A_K07]

Assessment methods of study outcomes

Formative assessment:

a) For the project: on the basis of progress in the implementation stages of the project, and knowledge of the issues necessary to carry b) for the lecture: on the basis of answers to questions about the topics covered in previous lectures

Recapitulative assessment:

a) For the project: on the basis of (1) the quality of the project (2) answers to questions about the project b) for the lecture: on the basis of exam - written work on the issues discussed during the lecture. The exam can be applied after obtaining the ratings of the project and the laboratory. The exam is passed, after giving the correct answers to most questions

Course description

Lecture: presentation of three basic concepts of production planning: global, hierarchical and successive. Planning decisions at the level of production: strategic, tactical and operational level. Planning decisions at the level of production: finished goods, components and operations.

Presented is the basic model of planning: a model MRP and MRPII. Presented is the concept of Lean Production with the 5phase implementation process. Discussed is the idea of shop floor control of the production, base control model and control principles (rules) and methods of interdepartmental and inter-departmental production control.

Project: Project: Creation of the planning and shop floor control system for the fixed production and organizational conditions including the planning at the level of finished goods, components and operations. Creation of a system of indicators (controlling) for the manufacturing process.

Didactic methods:

Lecture: Information and Problem Lecture,

Project: design method,

Laboratory: decision game.
