

| <b>STUDY MODULE DESCRIPTION FORM</b>  |  |  |
|---|--|--|
| Name of the module/subject<br><b>Product Ergonomics</b>   |  | Code<br><b>1011101351011127536</b>   |
| Field of study<br><b>Engineering Management - Full-time studies -</b>   | Profile of study<br>(general academic, practical)<br><b>general academic</b> | Year /Semester<br><b>3 / 5</b>   |
| Elective path/specialty<br><b>-</b>   | Subject offered in:<br><b>Polish</b>   | Course (compulsory, elective)<br><b>elective</b>   |
| Cycle of study:<br><b>First-cycle studies</b>   | Form of study (full-time, part-time)<br><b>full-time</b>                     |  |
| No. of hours<br>Lecture: <b>15</b> Classes: <b>15</b> Laboratory: <b>-</b> Project/seminars: <b>-</b>   |  | No. of credits<br><b>4</b>   |
| Status of the course in the study program (Basic, major, other)<br><b>other</b>   |  | (university-wide, from another field)<br><b>university-wide</b>  |
| Education areas and fields of science and art<br><b>technical sciences</b><br><b>Technical sciences</b>   |  | ECTS distribution (number and %)<br><b>100 4%</b><br><b>100 4%</b>   |
| <b>Responsible for subject / lecturer:</b><br>prof. dr hab. inż. Edwin Tytyk<br>email: edwin.tytyk@put.poznan.pl<br>tel. 616653377<br>Faculty of Engineering Management<br>ul. Strzelecka 11, 60-965 Poznań   |  | <b>Responsible for subject / lecturer:</b><br>dr inż. Marcin Butlewski<br>email: marcin.butlewski@put.poznan.pl<br>tel. 605883000<br>Faculty of Engineering Management<br>ul. Strzelecka 11, 60-965 Poznań |
| <b>Prerequisites in terms of knowledge, skills and social competencies:</b>   |  |  |
| 1   | <b>Knowledge</b>   | Student has basic knowledge about a workplace in the realm of ergonomics and macroergonomics.  |
| 2   | <b>Skills</b>  | Student can discern their system, socio-technical, organizational, economic and non-technical aspects of the human-technical object system.  |
| 3   | <b>Social competencies</b>   | Student is aware of the need to shape products including physical, psychological features and capabilities of an individual.   |
| <b>Assumptions and objectives of the course:</b><br>Developing an understanding for theoretical aspects and practical skills of ergonomic product development.  |  |  |
| <b>Study outcomes and reference to the educational results for a field of study</b>   |  |  |
| <b>Knowledge:</b>   |  |  |
| 1. Student has basic knowledge of products? lifecycle - [[K1A_W22]]<br>2. Student knows fundamental methods, techniques, tools and materials that are applied in solving simple engineering tasks relating building and machines? utilization - [[K1A_W24]]<br>3. Student has rudimental knowledge which is indispensable to comprehend non-technical conditions of engineering activity; knows basic health and safety procedures - [[K1A_W25]]<br>4. Student knows some typical industrial technologies and has an extensive knowledge of building technologies and machines? utilization - [[K1A_W27]] |  |  |
| <b>Skills:</b>  |  |  |
| 1. Student can make use of analytic, simulation and experimental methods to formulate and deal with engineering tasks - [[K1A_U13]]<br>2. Student can discern its systemic, socio-technical, organizational, economic and non-technical aspects - [K1A_U14]]<br>3. Student can make a preliminary economic analysis in taking up engineering activities - [[K1A_U15]]<br>4. Student can make an identification of project activities and solve simple project tasks within the area of product - [[K1A_U17]]  |  |  |
| <b>Social competencies:</b>   |  |  |

1. Student is conscious of the relevance and understands non-technical aspects and consequences of engineering activity, including an impact on a human being, and connected with it , responsibility for undertaken decisions - [[K1A\_K08]]
2. Student is aware of the fact, that creating the product which fulfils the user?s needs, requires system approach - [[K1A\_K09]]

### Assessment methods of study outcomes

Formative assessment:

Classes: current evaluation of the assigned tasks (from 0 to 5 points);

Lectures: evaluations based on questions relating to the presented materials during the previous lectures.

Collective assessment:

Classes: average of partial exercises; credits given after achieving at least 3.0;

Lectures: written test (open questions or multiple choice) concerning material presented during the lecture

### Course description

The notion of products and ergonomics of products. Criteria of product evaluation. Ergonomic design. Legal regulations and norms in ergonomic design. Tasks of ergonomics of products. Advantages of ergonomic product design. Disadvantages of low level of ergonomic product design. Methods, tools for ergonomic shaping of the product and evaluation of product ergonomic quality. Ergonomics and industrial design.

Didactic methods:

Lecture - conversational lecture

Exercises - classic problematic method, case study, staging method, idea exchange (brainstorming)

### Result of average student's workload

| Activity                          | Time (working hours) |      |
|-----------------------------------|----------------------|------|
| 1. lecture                        | 15                   |      |
| 2. preparation for lecture credit | 20                   |      |
| 3. classes                        | 15                   |      |
| 4. preparation for classes        | 30                   |      |
| 5. consultation                   | 20                   |      |
| 6. credits                        | 2                    |      |
| Student's workload                |                      |      |
| Source of workload                | hours                |      |
| Total workload                    | 102                  |      |
| Contact hours                     | 52                   |      |
| Source of workload                | hours                | ECTS |
| Total workload                    | 102                  | 4    |
| Contact hours                     | 52                   | 2    |
