Faculty of Engineering Management

STUDY MODULE DESCRIPTION FORM					
Name of the module/subject Insurance in logistics		Code 1011102421011137652			
Field of study	Profile of study (general academic, practical)	Year /Semester			
Logistics - Full-time studies - Second-cycle	(brak)	1/2			
Corporate Logistics	Subject offered in: Polish	Course (compulsory, elective) obligatory			
Cycle of study:	Form of study (full-time,part-time)				
Second-cycle studies	full-time				
No. of hours		No. of credits			
Lecture: 30 Classes: 15 Laboratory: -	Project/seminars:	- 2			
Status of the course in the study program (Basic, major, other)	(university-wide, from another fi	eld)			
(brak)	(brak) (brak)				
Education areas and fields of science and art	ECTS distribution (number and %)				
social sciences		2 100%			
Economics		2 100%			
Responsible for subject / lecturer:	Responsible for subject	t / lecturer:			
dr hab. Marek Szczepański, prof. PP email: marek.szczepanski@put.poznan.pl tel. +48 61 665 33 90 Faculty of Engineering Management	dr hab. Marek Szczepański email: marek.szczepański@ tel. +48 61 665 33 90 Faculty of Engineering Man	put.poznan.pl agement			

Prerequisites in terms of knowledge, skills and social competencies:

	· · · · · · · · · · · · · · · · · · ·				
1	Knowledge	- Student has a basic knowledge of micro-and macroeconomics.			
2	Skills	- Student is able to acquire and interpret basic legislation and other regulations (eg, General Conditions of Insurance) for insurance.			
3	Social competencies	Student has the capacity for teamwork and application of knowledge economy and knowledge of the law to solve problems related to risk management logistics company.			

Assumptions and objectives of the course:

Aims and objectives of the course:

- 1) To familiarize students with the basic knowledge of insurance (in particular transport insurance).
- 2) Manufacturing practical skills of decision-making on the selection of specific types of insurance risks in the logistics.
- 3) Construction of the ability to assess the risks and the proper application of the limitations of methods (methods of insurance and non-insurance methods).
- 4) To familiarize students with the basic knowledge of business insurance.

Study outcomes and reference to the educational results for a field of study

Knowledge:

- 1. Students will be able to categorize insurance to the specific issue discipline. [K2A_W09]
- 2. Student knows the ruling based on a given sphere of knowledge. [K2A_W03]
- 3. Student knows the meaning of applicable depending on the discipline of logistics. [K2A_W11]

Skills:

- 1. Student is able to independently develop insurance programm for logistic enterprise. [K2A_U02]
- 2. Student can apply appropriate techniques of information communication to solve the problem of the subject being studied. [K2A_U07]

Social competencies:

- 1. Student is able to learn throughout life, to inspire and organize the learning process of others. [K2A_K01]
- 2. Student is determined to think and act in a creative and enterprising. [K2A_K06]
- 3. Student is able to interact and work in a group, taking the different roles. [K2A_K03]

Assessment methods of study outcomes

Forming Rating:

- 1.A test checking the state of the practice (test of open and closed questions, tasks) in the last quarter of classes.
- 2. Projekt prepared in the groups? insurance program for selected logistics company.

Score

The final test to evaluate students' knowledge of the whole course program (open and closed questions, tasks). Eg. calculation of damages in different liability of the insurer).

Course description

- 1. The genesis and history of insurance.
- 2. The risk and risk management.
- 3. Insurance versus other risk management methods.

Result of average student's workload

Activity	Time (working hours)
1. Participation in exercises	15
2. Participation in lectures	15
3. Independent work of literature	25
4. Work on the project (in the group)	40

Student's workload

Source of workload	hours	ECTS
Total workload	60	2
Contact hours	30	1
Practical activities	30	1
