

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Planning and production control		Code 1011102421011118900
Field of study Logistics - Full-time studies - Second-cycle	Profile of study (general academic, practical) general academic	Year /Semester 1 / 2
Elective path/specialty Corporate Logistics	Subject offered in: Polish	Course (compulsory, elective) elective
Cycle of study: Second-cycle studies	Form of study (full-time, part-time) full-time	
No. of hours Lecture: 30 Classes: - Laboratory: - Project/seminars: 30		No. of credits 5
Status of the course in the study program (Basic, major, other) other		(university-wide, from another field) university-wide
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 5 100% 5 100%
Responsible for subject / lecturer: dr hab. inż. Łukasz Hadaś email: lukasz.hadas@put.poznan.pl tel. (61) 665 34 01 Wydział Inżynierii Zarządzania ul. Strzelecka 11 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	The student knows the basic concepts related to the management of production
2	Skills	The student has the ability to perceive and interpret the facts taking place in the sphere of production
3	Social competencies	The student understands the responsibility for decisions related to planning and shop floor control of production
Assumptions and objectives of the course: Getting to know the basics of the issues relevant to the field of production planning, presentation production planning system and shop floor control. Realization of the project system for planning and shop floor control.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. The student characterized decisions on the levels of production planning and shop floor control - [K2A_W02] 2. The student explains rules of formation and types of GHP - [K2A_W05] 3. The student characterized basic rules and methods of controlling the flow of material streams - [K2A_W08] 4. The student explains the basic concepts: model of production control, disruptions, time and buffer stock, the operational model - [K2A_W09] 5. The student describes the MRPII logic of planning - [K2A_W12] 6. The student characterized typical structure of production planning - [K2A_W13]		
Skills:		
1. The student is able to present solution of the a developed production planning system - [K2A_K04] 2. The student has the ability to self-propose solutions of specific problem in the area of production planning and shop floor control - [K2A_U05] 3. The student can design a process indicators analysis to evaluate the proposed production planning system - [K2A_U09] 4. The student can formulate task of building the system of production planning and shop floor control - [K2A_U17] 5. The student can design a production planning system for specific organizational conditions - [K2A_U19]		
Social competencies:		

1. The student is aware of their responsibility for their own work and the willingness to subordinate with the rules of teamwork and take responsibility in the group of project - [K2A_K03]

Assessment methods of study outcomes

Formative assessment:

a) For the project: on the basis of progress in the implementation stages of the project, and knowledge of the issues necessary to carry b) for the lecture: on the basis of answers to questions about the topics covered in previous lectures

Recapitulative assessment:

a) For the project: on the basis of (1) the quality of the project (2) answers to questions about the project b) for the lecture: on the basis of exam - written work on the issues discussed during the lecture. The exam can be applied after obtaining the ratings of the project and the laboratory. The exam is passed, after giving the correct answers to most questions

Course description

Lecture:

Overview of the typical planning structure for a manufacturing company.

Discuss production planning decisions at the level; strategic, tactical and operational.

Decisions in the field of production planning at the level of: finished goods, components and operations.

Create a Master Production Schedule (GHP).

"Forward" and "backward" planning. Model MRPII.

The essence of production control and control principles, together with methods of inter-departmental and intra-departmental production control, is discussed.

Project: Project: Creation of the planning and shop floor control system for the fixed production and organizational conditions including the planning at the level of finished goods, components and operations. Creation of a system of indicators (controlling) for the manufacturing process.

Didactic methods:

Lecture: information lecture, problem lecture

Project: project method

Basic bibliography:

Result of average student's workload

Activity	Time (working hours)	
1. Lecture	30	
2. Project	30	
3. Own work	40	
4. Consultation	10	
5. Preparing to pass exam	15	
Student's workload		
Source of workload	hours	ECTS
Total workload	125	5
Contact hours	70	3
Practical activities	30	1
