

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Construction project management		Code 1010125121010116039
Field of study Structural Engineering	Profile of study (general academic, practical) general academic	Year /Semester 1 / 2
Elective path/specialty Road-Train Engineering	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: Second-cycle studies	Form of study (full-time,part-time) part-time	
No. of hours Lecture: 18 Classes: 10 Laboratory: - Project/seminars: -		No. of credits 3
Status of the course in the study program (Basic, major, other) major		(university-wide, from another field) from field
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 3 100% 3 100%
Responsible for subject / lecturer: dr inż. Tomasz Wiatr email: tomasz.wiatr@put.poznan.pl tel. 665-2454, 665-2457 Faculty of Civil and Environmental Engineering ul. Piotrowo 5, 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Knowledge from area of key subjects contained in educational standard of the first-cycle civil engineer studies, including knowledge of construction techniques.
2	Skills	Designing of simpler civil structures at the area of selected branch of civil engineering, having regard operation needs.
3	Social competencies	Openness for cooperation, respect for common effects of creative designing work of engineers (authorship, as a result of teamwork).
Assumptions and objectives of the course: Co-creation of professional civil engineers qualifications, like a designers and managers in construction. Particular significance has integration of design and execution knowledge, specially with aid of network schedules.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Project management knowledge areas recognition and connection of them with rest construction knowledge (elements of construction project engineering). - [K_W10]		
2. Classification and application of software for project scheduling (PMS) with selected examples. - [K_W08]		
3. Knowledge improvement about construction facilities (specific for given specialty) across structures designing and optimisation of model facilities (concept and details). - [K_W09]		
Skills:		
1. Project managements systems and understanding of specification-estimate-schedule interdependencies. - [K_U02]		
2. Project information structures for purposes of construction planning and scheduling with aid of software - [K_U10]		
3. Ability od documentation preparation for procurement purposes (specifications, programming) - [K_U12]		
Social competencies:		
1. Overall look at project from the recipient (user/orderer/investor) and environment point of view in the aspect of whole life cycle of facility (construction-operation-deconstruction). - [K_K04]		
2. Competences for project teamwork (sense of common goal and role of communication and motivation) with taking of other project participants needs (coworkers, cooperants, stakeholders). - [K_K05]		
3. Readiness for engage in the professional practice towards independent technical functions with taking of society needs (ethics and professional liability). - [K_K01]		

Assessment methods of study outcomes		
Base of lecture note is writing test contained up to 10 issues (short tasks of calculate-, describe-, indicate- type) with over 5 fully correct answers; base of laboratories note is project elaboration.		
Course description		
Lecture: review of project management knowledge areas in construction; financial, procurement, payment and delivery systems of investment projects; formal and law procedures; project design, pre-tender and post-completion documentation (designing as project planing); methods of project planning and control (products, processes, resources), computer systems operating rules, practical tips.		
Basic bibliography:

3. Winch G. M., Managing Construction Projects. Blackwell Publishing, 2002.		
Result of average student's workload		
Activity	Time (working hours)	
1. Classes participation	45	
2. Works preparation	20	
3. Computer work	30	
4. Works finishing	10	
Student's workload		
Source of workload	hours	ECTS
Total workload	90	3
Contact hours	45	1
Practical activities	75	2
