

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Hydraulics and Hydrology		Code 1010104131010131219
Field of study Civil Engineering First-cycle Studies	Profile of study (general academic, practical) (brak)	Year /Semester 2 / 3
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) part-time	
No. of hours Lecture: 10 Classes: 10 Laboratory: - Project/seminars: -		No. of credits 2
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art technical sciences		ECTS distribution (number and %) 2 100%
Responsible for subject / lecturer: dr inż. Marcin Skotnicki email: marcin.skotnicki@put.poznan.pl tel. 61 665 24 69 Faculty of Civil and Environmental Engineering ul. Piotrowo 5 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Basic knowledge of the mathematics (algebraic equations, geometry, stereometry, integral and differential calculus) and physics (mechanics, thermodynamics)
2	Skills	Student should be capable to apply knowledge to solve practical problems
3	Social competencies	Student should be aware of results of taken decisions
Assumptions and objectives of the course: Presentation of basics of fluid mechanics and hydrology		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Student knows rules of hydrostatic pressure calculations and laws describing the pressure distribution in fluid (lect.) - [K_W01, K_W09]		
2. Student knows equations of steady, uniform flow in open channels, pipelines and porous media (lect.) - [K_W01, K_W10, K_W13]		
3. Student knows rules of calculations of design storms and flows for dimensioning of drainage and hydraulic structures (lect.) - [K_W01, K_W06, K_W17]		
Skills:		
1. Student can compute the hydrostatic pressure value (class) - [K_U02, K_U08]		
2. Student can compute the open channels and pipelines parameters (class) - [K_U02, K_U08]		
3. Student can evaluate design storms and flows parameters (class) - [K_U02, K_U08]		
Social competencies:		
1. Student is aware of the necessity of critical review of calculation results (class) - [K_K02, K_K09]		
2. Student is aware of the necessity of risk evaluation in drainage and hydraulic structures designing (lect.) - [K_K02, K_K10]		
Assessment methods of study outcomes		

Lectures - written test (15 -20 questions, duration up to 30 min) (effects W1, W2, W3, K2)		
Exercises - written test (3-4 problems, duration up to 60 min) and activity (effects U1, U2, U3, K1)		
Course description		
Physical properties of fluids, real and ideal fluids, forces in fluids. Statics of fluids - basic equation of fluid equilibrium and its application, fluid instruments for pressure measurement, hydrostatic pressure on flat and curved surfaces, diagram of pressure. Hydrodynamic pressure. Basic notion of fluid motion. Dynamics of ideal fluid: Bernoulli's equation and its interpretation. Motion of real fluid: Reynolds's experiment, laminar and turbulent flow. Hydraulics of pipelines: linear and local head losses, diagram of piezometric head pressure, hydraulic calculation of single pipeline, siphon, calculation of long pipelines, system of pipe, reservoirs. Fluid motion in pressureless pipelines: steady state flow in open channels, sewage channels, critical flow. Flows in porous media: Darcy's law, hydraulic conductivity coefficient, inflow to drainage ditch, wells. Hydrological cycle, rainfall-runoff transformation, rainfall characteristics, design storms and flows, IDF-curves.

Result of average student's workload		
Activity	Time (working hours)	
1. Participation in lectures (contact hours)	10	
2. Participation in excersises (contact hours)	10	
3. Prepration for excersises (work at home)	15	
4. Preparation for test (work at home)	13	
5. Presence on the tests (contact hours)	2	
Student's workload		
Source of workload	hours	ECTS
Total workload	50	2
Contact hours	22	1
Practical activities	0	0
