<b>Prerequisites in terms of knowledge, skills and social competencies:</b>		
1	<b>Knowledge</b>	The already acquired language competence compatible with level B2 (CEFR)
2	<b>Skills</b>	The ability to use general and field specific vocabulary, and grammatical structures required on the first level of studies
3	<b>Social competencies</b>	The ability to work individually and in a group; the ability to use various sources of information and reference works.
<b>Assumptions and objectives of the course:</b>		
1. Advancing students? language competence towards the level at least B2+ (CEFR). 2. Development of the ability to use field specific language effectively in both receptive and productive language skills. 3. Improving the ability to understand field specific texts. 4. Improving the ability to function effectively on an international market.		
<b>Study outcomes and reference to the educational results for a field of study</b>		
<b>Knowledge:</b>		
1. As a result of the course, the student ought to acquire field specific vocabulary related to the following issues: - [-] 2. Geotechnical monitoring - [-] 3. Hydrodynamic modeling - [-] 4. Academic Vocabulary in Use * Analysis of results * Classifying * Comparing and contrasting * Processes and procedures * Reporting - [-] 5. SPEAKING (describing content) - scientific/ technical article selected by a student - [-] 6. WRITING - SUMMARY - scientific/ technical article selected by a student - [-]		
<b>Skills:</b>		
1. As a result of the course, the student is able to: - [-] 2. give a talk on field specific topic (in English), and discuss field specific issues using an appropriate linguistic and grammatical repertoire - [-] 3. understand and analyze international, field specific literature - [-]		
<b>Social competencies:</b>		
1. As a result of the course, the student is able to communicate effectively in a field specific/professional area, and to give a successful presentation in English. The student is able to recognize and understand cultural differences in a professional and private conversation, and in a different cultural environment. - [-T1A_K01,T1A_K03,T1A-K07]		

<b>Assessment methods of study outcomes</b>		
? Formative assessment: tests (written and oral), summary and presentations during the course ? Summative assessment: credit		
To obtain a positive assessment the student is obliged to pass the material covered by the program with at least 50%.		
<b>Course description</b>		
Developing both general and technical vocabulary. Reading comprehension practice of professional scientific texts. Discussing environmental engineering issues referring to the Geotechnical monitoring and Hydrodynamic modelling Using academic vocabulary Writing summary Teaching methods are based on the improvement of four basic language skills (listening, speaking, reading, writing), which are a medium for broadening knowledge in the field of technical topics.
