

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Electromechanical Propulsion Systems		Code 1010325321010325452
Field of study Electrical Engineering	Profile of study (general academic, practical) (brak)	Year /Semester 1 / 2
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: Second-cycle studies	Form of study (full-time, part-time) part-time	
No. of hours Lecture: 10 Classes: - Laboratory: 20 Project/seminars: -		No. of credits 4
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 4 100% 4 100%
Responsible for subject / lecturer: Prof. dr hab. inż. Lech Nowak email: lech.nowak@put.poznan.pl tel. 61 665 2380 Wydział Elektryczny ul. Piotrowo 3A, 60-965 Poznań		Responsible for subject / lecturer: Wiesław Łyskawiński email: wieslaw.lyskawinski@put.poznan.pl tel. 61 665 2781 Wydział Elektryczny ul. Piotrowo 3A, 60-965 Poznań
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Basic knowledge in the area of theory, characteristics and the method of electrical machine control.
2	Skills	Matrix calculus on the basic level. Ability of the effective self-education in the field associated with chosen subject.
3	Social competencies	The student is aware of a need to expand its competence, readiness to undertake the cooperation in the team.
Assumptions and objectives of the course: Cel przedmiotu: The student should obtain knowledge of the mathematical models of induction and synchronous machines, as well as the brushed and brushless direct current motors. Getting knowledge about modern algorithms of vector control of induction motor and optimal control of the synchronous motor. Understanding of the principles of operation of regulated driving systems.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Student has a knowledge about developmental trends and the most significant new achievements in the electrical engineering, electronics, computer science and energetics. - [K_W04 +]		
2. Student has a knowledge about formulating equations describing simple driving systems, principles of the identification and using computer simulations software; has a knowledge in the scope of designing simple driving systems - [K_W10 +++]		
3. Student has a knowledge in the possibility and restrictions of methods used in CAD in the area of electrical engineering - [K_W18 +]		
Skills:		
1. Student is able to work individually and in the team, is able to assess tasks the time consumption; is able to manage the small team in the way guaranteeing the completion of setting in the established time - [K_U02 ++]		
2. Student is able to draw up detailed documentation of results of the experiment, of design or research task; - [K_U03 ++]		
3. Student is able to assess the possibility of using new technological achievements for the design and productions of the electrical devices and systems, containing innovative solutions - [K_U19 ++]		
Social competencies:		
1. The student understands the need of formulating both handing over to the society information and opinions of achievements in the area of electrical engineering and other aspects of activity of an electrical engineer - [K_K02 ++]		

Assessment methods of study outcomes		
<p>Lecture:</p> <ul style="list-style-type: none"> - constant judging on every classes (awarding a bonus to the activity and qualities of the perception), - evaluation of the knowledge and abilities on a written problem character examination. <p>Laboratory:</p> <ul style="list-style-type: none"> - the test and awarding a bonus to the essential knowledge of problems for the accomplishment stated in given area of laboratory tasks, - constant judging, on every classes - awarding a bonus to the increase in the ability of using with found principles and methods, - the evaluation of the knowledge and the abilities associated with the accomplishment of the exercise task, the evaluation of the report from the performed exercise. <p>Getting additional points for the activity during classes, particularly for:</p> <ul style="list-style-type: none"> - proposing discussing additional aspects of the issue, - ability of the cooperation in the team performing the task in the laboratory; - remarks about improving teaching materials. - quality of the elaborated reports. 		
Course description		
<p>Circuit models of induction machine, voltage equation in natural coordinate frame. Two-axis model of induction machine, transformation of impedance matrix. Equilibrium equations for drive with induction motors: steady state and transients. Scalar and field-vector control of induction motor drives Magnetic circuits. Equations of synchronous machines. Converter fed motor. Drives with stepping motors. Brushes DC motors and universal motors. Drives with brushless DC motors. Structures of control systems for electric drives.</p>		
Basic bibliography:		
<ol style="list-style-type: none"> 1. Wykłady z elektromechanicznych przemian Energii, Sobczyk T., Węgiel T., Wydawnictwo Politechniki Krakowskiej, Kraków 2014 2. Dynamics and Control of Electrical Drivers, Wach P., Springer Verlag, Berlin-Heidelberg, 2011. 3. Zasady elektromechanicznego przetwarzania energii (tłum. z angielskiego), Meisel J., Wydawnictwo Naukowo Techniczne, Warszawa, 1970. 4. Permanent magnet and Electromechanical Devices, Furlani E.P., Academic Press, 2001. 5. Wprowadzenie do napędów elektrycznych, Drozdowski P., Skrypt Politechniki Krakowskiej, Kraków, 1998. 6. Napęd elektryczny i jego sterowanie, Sidorowicz J., Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa, 1994. 7. Electrical drivers and electromechanical systems, Crowder R., Elsevier, 2006. 		
Additional bibliography:		
<ol style="list-style-type: none"> 1. Sterowanie silnikiem synchronicznym o magnesach trwałych, K. Zawirski, Wydawnictwo Politechniki Poznańskiej, Poznań, 2005. 2. Bezczujnikowe układy napędowe z silnikami indukcyjnymi, Orłowska-Kowalska T., Oficyna Wydawnicza Politechniki Wrocławskiej, Wrocław, 2003. 3. Automatyka napędu elektrycznego, Deskur J., Kaczmarek T., Zawirski K., Wydawnictwo Politechniki Poznańskiej, Poznań 2012. 		
Result of average student's workload		
Activity	Time (working hours)	
1. Participation in the lecture	10	
2. Participation in the laboratory exercises	20	
3. Participation in the consultation	20	
4. Participation in the examination	10	
5. Preparing for the examination	20	
6. Preparing for the laboratory exercises and carrying reports out	20	
Student's workload		
Source of workload	hours	ECTS
Total workload	100	4
Contact hours	55	2
Practical activities	32	2
