

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Electric power protection automatics		Code 1010314381010311551
Field of study Electrical Engineering	Profile of study (general academic, practical) (brak)	Year /Semester 4 / 8
Elective path/specialty Power Networks and Electric Power System	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time,part-time) part-time	
No. of hours Lecture: 9 Classes: - Laboratory: - Project/seminars: -		No. of credits 1
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art		ECTS distribution (number and %)
Responsible for subject / lecturer: dr inż. Bogdan Staszak email: bogdan.staszak@put.poznan.pl tel. 616652635 Faculty of Electrical Engineering ul. Piotrowo 3A 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	They have knowledge of the basics of electrical engineering, electric power industry
2	Skills	They can autonomously calculations for electricity networks
3	Social competencies	They are aware of the need to supplement the expertise and to cooperate in a group
Assumptions and objectives of the course: -The gain bases of specific knowledge for the work of power electric grid and the activities of the automatic protection		
Study outcomes and reference to the educational results for a field of study		
Knowledge: 1. They know the basic definitions of the parameters of the measure transformers and relays - [K_W05 +] 2. They have knowledge of the normal job requirements of a system-load capacity. They have knowledge of the job requirements of a system in short-circuit time ? the thermal and dynamic effects of short circuit current - [K_W11++] 3. They have knowledge of the division and function of electric power automatic protection; of the selection of setting of basic relays. - [K_W22+++]		
Skills: 1. They can broaden their knowledge using a complementary literature - [K_U09+] 2. They can analyze the working conditions of electric power automatic protection equipment in the power system - [K_U13++, K_U22++]		
Social competencies: 1. They are aware of the social effects of the proper use of electricity and the negative effects of its absence caused by the failure of power system - [K_K02++]		
Assessment methods of study outcomes		
- evaluation of the knowledge and skills shown out on the written exam		
Course description		

-Review the tasks of power automatic in the power system. A closer understanding of electric power automatic protection task with preliminary round on preventive, eliminative and restitutive. Where the automatic obtain information from - principle of the selection of measure transformers, calculation of short circuit currents. Operating principles and selection of set values of the simplest relays.

Result of average student's workload

Activity	Time (working hours)
1. Participation in lectures	15
2. Participation in consultations	2
3. Prepare for the exam	10

Student's workload

Source of workload	hours	ECTS
Total workload	27	1
Contact hours	17	1
Practical activities	0	0
