Assessment methods of study outcomes

Faculty of Electrical Engineering

Lecture:

?Assessment of the knowledge and skills during the problem-type written examination,

?Continuous assessment, at each class (bonus for activity and perception quality).

Laboratory:

?Test and bonus for a knowledge necessary to accomplish the problems posed in the lab task area,

?Assessment of the knowledge and skills related to the class task accomplishment, assessment of the lab report.

Adding extra points for activity in discussions, especially for:

?effectiveness of implementation of the knowledge acquired when solving a given problem.

?ability to cooperate in the team accomplishing in practice a specific task in lab.

?remarks related to the educational materials? enhancement,

?care and esthetic form of the elaborated lab reports and designs ? within the individual work,

Course description

Basic construction solutions of the medium and low voltage switches (circuit-breakers, load interrupters, disconnectors). Bus bar, bus ducts and MV switchgears. Distribution apparatus choice criterions. Test networks? structure and electric power devices testing methods.

Laboratory subjects are related to those presented during lectures.
