Name of the module/subject	STUDY MODULE DE		Code	4077	
	s in the Electric Power Engir		101031232101031	48//	
Field of study		Profile of study (general academic, practical)			
Electrical Engineeri	ng	(brak)	1/2		
Elective path/specialty Power Networl	s and Electric Power Syster	Subject offered in: Polish	, , ,	Course (compulsory, elective) obligatory	
Cycle of study:	F	form of study (full-time,part-time)	·		
Second-cycle studies		full-t	time		
No. of hours			No. of credits		
Lecture: 15 Class	es: - Laboratory: 15	Project/seminars:	- 2		
Status of the course in the stud	ly program (Basic, major, other)	(university-wide, from another fi	ield)		
	(brak)		(brak)		
Education areas and fields of s	cience and art		ECTS distribution (nur and %)	mber	
technical sciences			2 100%		
Responsible for sub	iect / lecturer:				
Wydział Elektryczny

Assessment methods of study outcomes

1. One is aware of the proper coordination of own activities within small task groups $-[K_K01 +]$

Faculty of Electrical Engineering

- -Determination of cooperation abilities within a team performing practical specific task
- -Assessment of knowledge and skills related to the accomplishment of a practical task, assessment of the report of the task performed
- -Test and awarding the knowledge necessary to carry out the given problems in the given task area
- -Assessment of the knowledge and skills demonstrated in the written test

Course description

-Optimization and decision-making problems. Decision-making algorithms? decision making under risk conditions, identification of the power system operational state. Power flow and voltage levels calculation algorithms in the network and generation nodes. Network nodes control algorithms in the transmission and distribution system within regulation range of voltage, considering the flows of active and reactive power. Decision algoritms in power system restitution process.

Applied training methods

Lecture: the theory of the closely related to practice, Multimedia lecture

Laboratory: Computational experiments, working in a team

Laboratory activities:

Algorithms sequence of switching operations in power stations. Creating algorithms and computer programs implementing specific network tasks.

Result of average student's workload

Activity	Time (working hours)
1. participation in lectures	15
2. participation in laboratory classes	15
3. participation in the consultations	8
4. preparation to the laboratory classes and accomplishment of the report	18
5. preparation for the exam	5
6. exam	2

Student's workload

Source of workload	hours	ECTS		
Total workload	63	2		
Contact hours	38	1		
Practical activities	33	1
