

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Electrical installations		Code 1010321371010321941
Field of study Electrical Engineering	Profile of study (general academic, practical) (brak)	Year /Semester 4 / 7
Elective path/specialty Electrical and Computer Systems in	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) full-time	
No. of hours Lecture: 15 Classes: - Laboratory: - Project/seminars: 30		No. of credits 5
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 5 100% 5 100%
Responsible for subject / lecturer: Arkadiusz Dobrzycki email: arkadiusz.dobrzycki@put.poznan.pl wladyslaw.opydo@put.poznan.pl tel. 616652685 Elektryczny ul. Piotrowo 3A, 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Basic knowledge of electrical engineering and power engineering.
2	Skills	Using a spreadsheet. Ability to effectively self-education in a field related to the chosen field of study.
3	Social competencies	Is aware of the need to broaden their competence, willingness to work together in a team.
Assumptions and objectives of the course: Knowledge of design, construction and operation of electrical and low-voltage distribution networks. Learning the processes of the design documentation for the installation of electrical equipment.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. has a basic and systematic knowledge of construction, design and operation of electrical systems and networks - [K_W04+, K_W08++]		
2. knows the electrical installations design methodologies used for this purpose software, and versed in modern technology in installations - [K_W18++]		
Skills:		
1. able to compare different variants of power users and consumers due to the given criteria, as well as how to develop the design documentation for electrical installations using specialized software - [K_U07+++, K_U01++, K_U12++]		
Social competencies:		
1. is aware of the responsibility of the engineer-energy, in particular the impact of its activities on the safe operation of electrical installations - [K_K02+]		
Assessment methods of study outcomes		

<p>Lecture: ? assess the knowledge and skills listed on the written exam, ? continuous evaluation for each course (rewarding activity and quality perception).</p> <p>Class project: ? assessment of the final design for the electrical system, ? assessment review progress made on the project, as well as active participation in the classes.</p> <p>Get extra points for the activity in the classroom, and in particular for: ? propose to discuss further aspects of the subject, ? the effectiveness of the application of the knowledge gained during solving the given problem, ? diligence aesthetic design of the project.</p>		
Course description		
<p>Electrical equipment of low voltage electrical installations, and their characteristics and parameters. Principles of construction, design, operation and testing low-voltage electrical installations providing security protection, shock protection for low-voltage electrical installations Rules rescue of persons affected by electricity.</p> <p>Update 2017: computer aided design of electrical installations.</p> <p>Applied methods of teaching: lectures - multimedia presentations (including drawings, photos, animations, sound, films) supplemented by examples given on the whiteboard, interactive lecture with questions to students or specific students, lecture initiate discussion, taking into account different aspects of the issues presented, including: economic, environmental, legal, social, etc., offer a new topic preceded by a reminder of the related content, known to students of other subjects; project - analysis of various technical solutions and aspects of solving problems, including: economic, ecological, legal, social, etc., detailed review of the project documentation by the project leader and commentary discussion, case study, teamwork.</p>		
Basic bibliography:		
<ol style="list-style-type: none"> 1. Markiewicz H.: Instalacje elektryczne, WNT, Warszawa 2012. 2. Lejdy B.: Instalacje elektryczne w obiektach budowlanych, WNT, Warszawa 2003. 3. Niestępski S., Parol M., Pasternakiewicz J., Wiśniewski T.: Instalacje elektryczne. Budowa projektowanie i eksploatacja, Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa 2011. 4. Orlik W.: Egzamin kwalifikacyjny elektryka w pytaniach i odpowiedziach, KaBe S. C., Krosno 2011. 5. Markiewicz H.: Instalacje elektryczne, WNT, Warszawa 2012. 6. Lejdy B.: Instalacje elektryczne w obiektach budowlanych, WNT, Warszawa 2003. 7. Niestępski S., Parol M., Pasternakiewicz J., Wiśniewski T.: Instalacje elektryczne. Budowa projektowanie i eksploatacja, Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa 2011. 8. Orlik W.: Egzamin kwalifikacyjny elektryka w pytaniach i odpowiedziach, KaBe S. C., Krosno 2011. 		
Additional bibliography:		
<ol style="list-style-type: none"> 1. Internet websites about electrical installations. 2. Standards and law regulations connectec with electrical installations 3. Wires and installation equipment catalogs. 		
Result of average student's workload		
Activity	Time (working hours)	
1. participation in lectures	15	
2. participation in project classes	30	
3. participate into consultations concerning the lecture	5	
4. participate into consultations concerning the project classes	10	
5. development of project	40	
6. prepare for the exam	15	
7. completion of projects	4	
8. participation in the exam	2	
Student's workload		
Source of workload	hours	ECTS
Total workload	121	5
Contact hours	66	3
Practical activities	84	3
