STUDY MODULE DESCRIPTION FORM

Name of the module/subject **Administration in selected information systems**		Code **1010331561010337133**
Field of study **Information Engineering**	Profile of study (general academic, practical) **(brak)**	Year /Semester **3 / 6**
Elective path/specialty **Information Technologies**	Subject offered in: **Polish**	Course (compulsory, elective) **obligatory**
Cycle of study: **First-cycle studies**	Form of study (full-time,part-time) **full-time**	

No. of hours				No. of credits **3**
Lecture: **15**	Classes: **-**	Laboratory: **15**	Project/seminars: **-**	

Status of the course in the study program (Basic, major, other) **(brak)**	(university-wide, from another field) **(brak)**

Education areas and fields of science and art **technical sciences**	ECTS distribution (number and %**)** **3 100%**

Responsible for subject / lecturer:

dr inż. Tomasz Bilski
email: tomasz.bilski@put.poznan.pl
tel. 061 66 53 554
Faculty of Electrical Engineering
ul. Piotrowo 3A 60-965 Poznań

Prerequisites in terms of knowledge, skills and social competencies:

1	**Knowledge**	K_W07: Student has organized knowledge with theoretical foundations of computer networks. K_W13: Student has organized knowledge with theoretical foundations of data protection and IT system security. K_W18: Student knows common IT engineering technology.
2	**Skills**	K_U04: Student is able to prepare and to demonstrate short presentation of engineering task results. K_U05: Student is able to self learning in order to increase professional skills. K_U11: potrafi dokonać krytycznej analizy sposobu funkcjonowania sprzętu komputerowego, systemu operacyjnego (lub ich fragmentów) i sieci komputerowych
3	**Social competencies**	K_K02: Student understands and is aware of the importance of nontechnical issues related to computer engineer activity. Student understands the responsibility associated to his engineering decisions. K_K05: Student is able to think and work in enterprising way.

Assumptions and objectives of the course:

Students should obtain theoretical knowledge and experience in IT system management with special emphasis on such issues as: data security, operational environment heterogeneity.

Study outcomes and reference to the educational results for a field of study

Knowledge:

1. Student has organized knowledge with theoretical foundations of computer networks. - [K_W07]

2. Student has organized knowledge with theoretical foundations of data protection and IT system security. - [K_W13]

3. Student has basic knowledge of IT system management. - [K_W14]

Skills:

1. Student is able to work alone and in a group; student can assess time needed to finish a given work; student can develop and realize schedule necessary to keep up deadlines. - [K_U02]

2. Student is able to do critical analysis of computer hardware operations, operating system and computer networks. - [K_U11]

Social competencies:

1. Student understands and is aware of the importance of nontechnical issues related to computer engineer activity. Student understands the responsibility associated to his engineering decisions. - [K_K02]

2. Student is able to think and work in inventive way. - [K_K05]

Assessment methods of study outcomes
Lecture ? test.
Project - project assessment.

Course description

Lecture

Functions, duties and tasks of network manager. Elements of the management process: hardware configuration, access control system, user account management, monitoring, optimization, time management, security violations, system documentation, contingency plan, resource planning, personnel management, cooperation with service providers, system development. Basic tools and protocols for network management (e.g. SNMP, DHCP, NTP, DNS, syslog). Information security policy.

Course update 2017: new models of networks (NFV, SDN), cloud computing.

Teaching methods:

- lectures with multimedia presentations,

- additional topics available in Moodle course.

Laboratory

DHCP server configuration. DNS server configuration. Computer networks management with SNMP and other tools. Access control system. User and admin accounts management.

Result of average student's workload	
Activity	**Time (working hours)**
1. Lectures	8
2. Projects	8
3. Test preparation	15
4. Theoretical preparation for projects	5
5. Practical preparation for projects	42
6. Test	2
7. Consultations	7

Student's workload		
Source of workload	**hours**	**ECTS**
Total workload	87	3
Contact hours	25	1
Practical activities	50	2
