STUDY MODULE DESCRIPTION FORM								
Name of the module/subject Basics of Work Safety			Code 1011105221011120153					
Field of study			Profile of study (general academic, practical)	Year /Semester				
Engineering Management - Part-time studies -			(brak)	1/2				
Elective path/specialty Quality Systems and Ergonomics			Subject offered in: Polish	Course (compulsory, elective) elective				
Cycle of study:			Form of study (full-time,part-time)					
Second-cycle studies			part-time					
No. of hours				No. of credits				
Lecture: 10	Classes	s: 10 Laboratory: -	Project/seminars:	- 3				
Status of the cours	-	program (Basic, major, other)	(university-wide, from another f	,				
Education areas a		(brak)		(brak)				
dr Jerzy S.Ma email: email: tel. tel. 61-66 Wydział Inżyr	arcinkowski jerzy.s.marc 53408 ; 61 6 nierii Zarzadz	zania						
	ul. Strzelecka 11,60-965 Poznań Prerequisites in terms of knowledge, skills and social competencies:							
1 Know	ledge	No predecessors in previous ser	nesters.					
2 Skills		The student has the ability to perceive, associate and interpret phenomena in the social relations of occupational safety.						
3 Socia comp	l etencies	The student understands and is the management of organization a group.						
Assumption	s and obj	ectives of the course:						
Providing studer ways to achieve		basics of business management is	sues, including occupational sa	afety management functions and				
Stu	idy outco	mes and reference to the	educational results for	a field of study				
Knowledge:								
 Student knows the basic methods and techniques of work organization [K1A_W22] - [[K1A_W22]] Student knows the basic methods of interpersonal communication in the field of occupational safety systems [K1A_W24] - [[K1A_W24]] The student has a basic knowledge of management, including occupational risk management and occupational safety in the enterprise [K1A_W31] - [[K1A_W31]] 								
	use a variety	of techniques to communicate in	the workplace and other enviro	onments [K1A_U02] -				
[[K1A_U02]] 2. Student is abl systems [K1A_U		the actions in terms of economic o	engineering in existing occupat	ional safety management				
Social comp								
1. Student is fully aware of the responsibility that he has taken for his own work and expresses readiness to comply with the rules of team work as well as responsibility for mutually realized and completed tasks. [K1A_K03] - [[K1A_K03]]								
2. Can determine some causal relationships in the process of targets implementation and rank pertinence of alternative or competitive tasks [K1A_K04] - [[K1A_K04]]								
 The student is aware of the importance of behaving in a professional manner and to comply with the rules of professional ethics as well as having respect for the diversity of views and cultures [K1A_K05] - [[K1A_K05]] The student is able to plan and manage business ventures within the safety management [K1A_K06] - [[K1A_K06]] 								
4. The student is	able to plar	and manage business ventures v	within the safety management	[K1A_K06] - [[K1A_K06]]				

Assessment methods of study outcomes	
ormative assessment:	
lasses:	
. Current monitoring of the systematically performed tasks during classes	
. On the last meeting there will be a final test from the material covered during the semester classes	
ollective assessment:	
ectures:	
Assessment of knowledge of the material discussed during the lectures presented on the basis of the students?	answers
. Final examination carried out during a session or a pass on the rights of the exam during the last meeting with th the form of a multiple choice, gap-filling, true/false test, including the material presented during lectures	ne student
Course description	
OCCUPATIONAL SAFETY MANAGEMENT	
.1 Definition of occupational safety management	
.2 Traditional and systemic approach to occupational safety issues	
MAIN OBJECTIVES OF BP MANAGEMENT	
.1 Objectives and occupational safety management	
2 Principles of effective occupational safety management	
OCCUPATIONAL SAFETY MANAGEMENT SYSTEM / SZBP / AND ITS COMPONENTS.	
3.1 Occupational safety policy in the company	
2 The planning of activities within the occupational work safety	
3.3 Implementation and functioning of occupational safety management system	
3.4 Monitoring and audit SZBP. The types of safety audits.	
B.5 Overview of the system.	
.6 Documentation of occupational safety management system	
7 Basic effectiveness conditions of the SZBP functioning	
EFFECTIVENESS OF OCCUPATIONAL SAFETY MANAGEMENT SYSTEMS	
.1 Effectiveness of systemic bp management in selected Western countries	
1.2 Results of the effectiveness of health and safety management systems in Polish enterprises	
lasses. Their implementation comes down to the preparation of:	
Assumptions to the designed occupational management system. Review of initial establishment, including:	
1. The analysis of the establishment?s safety	
.2. System diagnosis of an establishment / department / division	
.3. Final Report	
Project about an occupational safety management system, including:	
.1. The output data of the project and / or definitions, documents, names referenced in the project /	
.2. The requirements of the proposed occupational safety management system / SZBP /	
. Rules of implementation and exploitation in an occupational safety management system / SZBP /, including:	
.1. Block diagram of the implementation of the occupational safety management system / SZBP /	
.2. A plan for implementation of occupational safety management system/ SZBP /	
8.3. Implementation and exploitation of the occupational safety management system / SZBP /

Result of average student's workload

Activity	Time (working hours)
1. Participation in lectures	10
2. Participation in classes	10
3. Preparation for classes exercises	10
4 Preparation for the written credits (based on classes)	10
5 Preparation for the written credits (based on lectures)/exam	10
Student's workload	

Source of workload	hours	ECTS
Total workload	50	3
Contact hours	20	2
Practical activities	10	1
