

<b>STUDY MODULE DESCRIPTION FORM</b>		
Name of the module/subject <b>Tools of information management system design</b>		Code <b>1011105211011165111</b>
Field of study <b>Corporate Management - Part-time studies -</b>	Profile of study (general academic, practical) <b>(brak)</b>	Year /Semester <b>1 / 1</b>
Elective path/specialty <b>Corporate Management</b>	Subject offered in: <b>Polish</b>	Course (compulsory, elective) <b>elective</b>
Cycle of study: <b>Second-cycle studies</b>	Form of study (full-time, part-time) <b>part-time</b>	
No. of hours Lecture: <b>10</b> Classes: <b>-</b> Laboratory: <b>-</b> Project/seminars: <b>-</b>		No. of credits <b>4</b>
Status of the course in the study program (Basic, major, other) <b>(brak)</b>		(university-wide, from another field) <b>(brak)</b>
Education areas and fields of science and art <b>technical sciences</b>		ECTS distribution (number and %) <b>4 100%</b>
<b>Responsible for subject / lecturer:</b> prof. dr hab. inż. Stefan Trzcieliński email: stefan.trzcielinski@put.poznan.pl tel. 61 665 33 72 Faculty of Engineering Management Strzelecka 11		<b>Responsible for subject / lecturer:</b> dr inż. Joanna Kałkowska email: joanna.kalkowska@put.poznan.pl tel. 61 665 33 72 Faculty of Engineering Management Strzelecka 11
<b>Prerequisites in terms of knowledge, skills and social competencies:</b>		
1	<b>Knowledge</b>	Student has the knowledge concerning fundamentals of management and science of organization
2	<b>Skills</b>	Student is able to identify both types of organizational structures and designing production structure of first complexity degree units
3	<b>Social competencies</b>	Student is willing and ready to develop his knowledge as well as he is opened for teamwork
<b>Assumptions and objectives of the course:</b> -The goal of the subject is to get to know with tools of information system design as well as mastering the ability of information system design		
<b>Study outcomes and reference to the educational results for a field of study</b>		
<b>Knowledge:</b>		
1. Student has the deepen knowledge concerning the determinants of organizational structures as well as mechanisms of changes in enterprise - [K2A_W03]		
2. Student has the deepen knowledge concerning connections and organizational dependencies appearing between organizational units in enterprise - [K2A_W05]		
3. Student knows the methods of modeling the organizational functions with function tree approach - [K2A_W07]		
4. Student knows methods and tools of decision-making processes modeling - [K2A_W08, K2A_W09]		
5. Student has the deepen knowledge about enterprise - [K2A_W14]		
6. Student has the deepen knowledge concerning changes in organizational structures and managing these changes - [K2A_W15]		
7. Student has the deepen knowledge concerning organizational structures as well as types of organizational bonds and its historical evolution - [K2A_W16]		
<b>Skills:</b>		

<p>1. Student is able to use theoretical knowledge to identify causes and follow of information processes supported by computing system - [K2A_U02]</p> <p>2. Student is able to analyze disruption causes and follow of information processes supporting by computing system - [K2A_U03]</p> <p>3. Student is able to forecast and modeling complex decision-making processes using computer aided methods - [K2A_U04]</p> <p>4. Student has ability of proper selection of tools supporting design and modeling information processes - [K2A_U06]</p> <p>5. Student is able to propose solutions in designing processes and information systems supported by computing system - [K2A_U07]</p>
<p><b>Social competencies:</b></p> <p>1. Student is conscious to be opened for the propositions of alternative solutions of designing enterprise's information system supporting by computer system - [K1A_K02]</p> <p>2. Student is responsible for carry out the implementation of information technologies IT supporting management in enterprise - [K1A_K03]</p> <p>3. Student is conscious of interdisciplinary knowledge and skills required to solve complex problems while designing information systems - [K1A_K06]</p>

<b>Assessment methods of study outcomes</b>		
<p>-Forming grade:</p> <p>a) projects - on the basis of the evaluation the systematical progress of carried out tasks b) lectures: on the basis of the answers to the questions concerning the discussed problems at the previous lectures,</p> <p>Sum up grade:</p> <p>a) projects: (1)public presentation of the prepared projects; (2) form and quality of prepared materials</p> <p>b) lectures: test of 15 questions (at least the 55% of answers have to be correct)</p>		
<b>Course description</b>		
<p>- Enterprise's management system and its subsystems. Approaches to management systems design. Process orientation in modeling management systems. Modeling management systems with using function tree approach, modules methods Buscharadt method. Computer tools supported modeling information systems: OBDOK, ARIS, WorkFlow</p>		
<b>Basic bibliography:</b>
