# Assessment methods of study outcomes

#### Forming assessment:

Project: evaluation of current progress of the construction of a logical model of an application prepared within classes on Access database

Lecture: questions asked during the lecture, which refer to previous lectures on the subject

Final assessment:

Project: Final evaluation of the logical project of the application prepared along the course of project classes from the range of Access databases

Lecture: exam

### **Course description**

Construction, implementation and modification of an information system; integration of information systems; instruments for software engineering, functional requirements, discipline requirements, system requirements of the user, requirements engineering process, requirement management, construction of software prototypes, software customization, management of information system implementation,

personnel management of IT projects - P-CMM model; estimation of software costs.

Teaching methods:

1. method of demonstration with instruction

- 2. the method of an individual project
- 3. the method of the experiment

#### Basic bibliography:

1. Borucki A. (2012). E-Biznes. Wydawnictwo Politechniki Poznańskiej. Poznań.

2. Kolbusz E., Olejniczak W., Szyjewski Z. (2005). Inżynieria systemów informatycznych w e-gospodarce. PWE. Warszawa.

3. Sommerville I. (2003). Inżynieria oprogramowania. WNT. Warszawa.

4. Jaszkiewicz A. (1997). Inżynieria oprogramowania. Helion. Gliwice.

## Additional bibliography:

1. Szpringer W. (2012). Innowacyjne modele e-biznesu. Difin. Warszawa.

2. Flasiński M.(2008). Zarządzanie projektami informatycznymi.PWN

Result of average student's workload					
Activity	Time (working hours)				
1. Lecture		12			
2. Project		14			
3. Preparation for the project	15				
4. Consultations	13				
5. Final assessment and exam	5				
Student's wo	rkload				
Source of workload	hours	ECTS			
Total workload	60	2			
Contact hours	50	2			
Practical activities	14	0
