		STUDY MODULE DE	ESCRIPTION FORM	
	f the module/subject rational Researc	h and Econometrics	Code 1011102211011134996	
Field of	study		Profile of study	Year /Semester
Enai	neering Manage	ment - Full-time studies -	(general academic, practical) general academic	1/1
Elective path/specialty Quality Systems and Ergonomics			Subject offered in:	Course (compulsory, elective)
			Polish	obligatory
Cycle of	study:		Form of study (full-time,part-time)	
Second-cycle studies full-time			ime	
No. of h	ours			No. of credits
Lectur	e: 15 Classes	s: 15 Laboratory: 15	Project/seminars:	- 3
Status o	of the course in the study	program (Basic, major, other)	(university-wide, from another field	eld)
		other	unive	rsity-wide
Education areas and fields of science and art				ECTS distribution (number and %)
social sciences				3 100%
dr T ema tel. 6 Wyd	onsible for subje omasz Brzęczek iil: tomasz.brzeczek@ 61 665 33 92 Iział Inżynierii Zarządz Izrzelecka 11 60.965 B	put.poznan.pl zania		
	Strzelecka 11 60-965 F	s of knowledge, skills and	l social compotencies:	
Fiele		s of knowledge, skills and	a social competencies.	
1	Knowledge	Student knows economic terms a management problems.	and management problems, esp	opecially operation
2	Skills	Student has Excel and computer skills. Makes basic operations of matrix algebra.		
3	Social competencies	Student works in team and prepa	ares a project.	
Assu	•	ectives of the course:		
To dev	elop skills of input-out	put modeling in management syste imization and methods of estimation		deliver knowledge about
	Study outco	mes and reference to the	educational results for	a field of study
Know	/ledge:			
1. Stud	lent knows typical opti	mization problems in management	t, their objectives and constrain	ts [K2A_W01]
2. Knov	ws problems of produc	ction structure, mixture and schedu	ılling [K2A_W09]	
	•	s for tasks, resources, travel route		
		ds with continous and descrete va	riable and linear or non-linear f	unction [K2A_W09]
5. Knov	ws multi criteria optimi	zation methods [K2A_W09]		
	· · · ·	ares method [K2A_W10]		
Skills				
		t model of economic system effect		
		s: graphical, simplex, graphs and t		
		nizes models with Excel, GRETL a		
		s (aims hierarchy, metacriterion, f	• • •	.U04]
5. Estir	nates linear and linae	rizable econometric models with O	LS [K2A_U04]	
6. Expl	ains results of optimiz	ation and econometric models and	uses them in management	[K2A_U02]
Socia	I competencies:			
1. Stud	lent is aware of optimi	zation benefits in management and	d planning [K2A_K03]	
2. Spre	ads optimization in m	anagement problem solving [K2/	A_K05]	
3. Can	objectively assess an	d analyze data and solutions of ma	anagement problems [S2A_K	06]

Assessment methods of a	study outcomes			
Partial mark:				
a) task solving at lecture and exercise classes				
b) solving Excel case studies				
Pass mark:				
a)Lecture and exercises pass mark based on partial marks and results	s of written test of tasks solvin	g.		
b) Laboratory pass mark based on partial marks and results of case st	tudies to be solved using a co	mputer.		
Course descrip	otion			
1. Estimation of linear and linearizable econometric models with OLS.				
2. Clasification and modeling of decision tasks. Problems of production and tasks allocation.	n structure, mixture, resource	division, transportation		
3. Linear programming. Simplex and graphical method.				
4. Multi-criteria continous programming. Metacriterion, objectives hiera	archy.			
5. Multi-criteria integer programming. Fulfillment degre, AHP.				
6. Net programming. CPM ? critical path method. PERT-program eval	uation and review technique.			
7. Transportat optimization problem and Little algorithm.				
8. Decisions under risk. Decision tree and a newsboy problem.				
DYDACTIC METHODS: lecture with problem analysis, exercises, case	e study.
