	STUDY MODULE D	ESCRIPTION FORM		
Name of the module/subject Construction and Exploitation of Machines			Code 1011101321011126776	
Field of study	ctudios Eirot avalo studi	Profile of study (general academic, practical)		
	studies - First-cycle studi		1/2	
Elective path/specialty	-	Subject offered in: Polish	Course (compulsory, elective elective	
Cycle of study:		Form of study (full-time,part-time)	·	
First-cycle studies		full-	full-time	
No. of hours			No. of credits	
Lecture: 15 Classe	es: - Laboratory: -	Project/seminars:	- 3	
Status of the course in the stud	y program (Basic, major, other)	(university-wide, from another f	ield)	
	other	unive	ersity-wide	
Education areas and fields of science and art			ECTS distribution (number and %)	
technical sciences			3 100%	
Technical sciences			3 100%	
tel. 665 33 77 Faculty of Engineering N ul. Strzelecka 11 60-965	•			
Prerequisites in terr	ns of knowledge, skills and	d social competencies:		
1 Knowledge	Basic knowledge of the introduct	ion to the technology and engi	neering graphics	
2 Skills	The ability to acquire knowledge			
Social competencies	The ability to work in a group			
	iectives of the course:			
Assumptions and ob	,			
•	familiarize the students with the mo	est important information from t	he operation of the machines,	
The aim of the subject is to their use and handling.	•	· 	·	
The aim of the subject is to their use and handling.	familiarize the students with the mo	· 	·	
The aim of the subject is to their use and handling. Study outco Knowledge: 1. 1. Has a basic knowledge [K1A_W05]	familiarize the students with the mo	educational results for	a field of study	
The aim of the subject is to their use and handling. Study outco Knowledge: 1. 1. Has a basic knowledge: (K1A_W05] 2. 2. Has a basic knowledge	familiarize the students with the mo	educational results for	a field of study	
The aim of the subject is to heir use and handling. Study outco Knowledge: 1. 1. Has a basic knowledge K1A_W05] 2. 2. Has a basic knowledge Skills:	familiarize the students with the mo	educational results for rechnology, the construction aring industry as well as the strength	a field of study and operation of machinery - angth of materials - [K1A_W07]	

supply, logistics, ecologistics) and supply chain management - [K1A_U09]

- Social competencies:

 1. Is aware of the need for lifelong learning; inspiring and organizing the learning process of other persons within the framework of the studied subject areas [K1A_K01]
- 2. . Is willing to work together and work in a group on the resolution in the framework of the studied subject [K1A_K03]

Assessment methods of study outcomes

Faculty of Engineering Management

Formative assessment:

- a) within the scope of the laboratory: on the basis of an assessment of the current progress of the assigned tasks related to the construction, operation and operation of general purpose machinery and equipment.
- b) in lectures: on the basis of answers to questions about material modified in previous lectures.

Summary summary:

- a) lecture written test on the basis of previously prepared questionnaire
- b) Written assignment of assigned tasks related to the construction, operation and operation of general purpose machinery and equipment within individual visits to production sites.

Course description

The program of the subject includes the following subject areas: the genesis of learning about the exploitation, the existence of a technical object, theories of exploitation. Rules for the exploitation of equipment. Use of the devices. Elements of tribology, friction, wear, lubrication, the top layer. Basic issues associated with reliability, quality and durability. Diagnostic machines. Types of diagnostic tests. Maintenance of machinery and equipment related to logistics, maintenance of means of transport and storage devices.

Laboratory

Technological process of repair of machinery. Disassembly. Repairs. Review, regeneration, machine parts. Regeneration methods of machine parts and their repair. Installation of machine parts. Methods of maintaining and securing the moving machinery.

Didactic methods:

Lectures; monographic with the use of a computer with the division of the content of the program into separate thematic issues in connection with the subject of the laboratory

Laboratories: visits to manufacturing plants in the field of construction, operation, operation of general purpose machinery and equipment and their maintenance and protection in motion.

Basic bibliography:
