# **Faculty of Engineering Management**

STUDY MODULE DESCRIPTION FORM  Name of the module/subject  Network Operating Systems		Code 1011105211011100851		
Field of study		Profile of study (general academic, practical)	Year /Semester	
Engineering Manage	ement - Part-time studies -	(brak)	1/1	
Elective path/specialty  Quality Sy	stems and Ergonomics	Subject offered in: <b>Polish</b>	Course (compulsory, elective elective	
Cycle of study:		Form of study (full-time,part-time)		
Second-cycle studies		part-	part-time	
No. of hours			No. of credits	
Lecture: 12 Classe	es: - Laboratory: -	Project/seminars:	- 2	
Status of the course in the study	r program (Basic, major, other)	(university-wide, from another fi	eld)	
(brak)			(brak)	
Education areas and fields of so	ience and art		ECTS distribution (number and %)	
Responsible for subj	ect / lecturer:	Responsible for subject	et / lecturer:	
Responsible for subj	ect / lecturer:	Responsible for subject

architecture and the impact of the Internet and mobile computing on operating systems design.

# Study outcomes and reference to the educational results for a field of study

### Knowledge:

- 1. The students should know the structure and the main tasks of operating systems layers and tools. [K2A\_W08]
- 2. Students should describe the evolution of operating systems and the influence of the development of computer networks. [K2A\_W09]
- 3. They should be familiar with typical elements of user interfaces, tools and cofiguration tasks in operating systems. -[K2A\_W08]
- 4. Students should have some understending how Application Programmers Interfaces (API-s) facilitate software development and how this is related to operating systems. - [K2A\_W17]

- 1. Student should be able to do typical network configuration tasks in Windows and Linux operating systems. [K2A\_U06]
- 2. They should plan and set users accounts and access rights and formulate security policy. [K2A\_U06]
- 3. They should be able to prepare examples of programs that work in different operating environments. [K2A\_U06]

#### Social competencies:

1. Students should be aware of responsible use and configuration of file systems and other computer systems resources. -[K2A\_K05 K2A\_K06]

#### Assessment methods of study outcomes

# Faculty of Engineering Management

#### Forming rating:

- exercises - assessment of laboratory exercises

#### Summary rating:

- exercises the average of partial grades
- lecture exam

### **Course description**

#### -Lectures:

The layers and tasks of operating systems. Short explanation of terms: process management (processes, threads, CPU scheduling, synchronization, and deadlock), memory management (segmentation, paging, swapping), file system. The network architecture of Windows and Unix/Linux. The Application Programmers Interface for network operation - simple examples. Graphical User Interfaces and the impact of the Internet and Web Applications. Virtual computing environment and cloud computing.

#### -Laboratories:

Depending on students experience laboratory exercises provide more or less advanced illustrative material to lecture subjects. This may include: configuring Windows and Linux users access rights, FTP and HTTP servers, simple shell scripting.

#### Teaching methods:

- information lecture
- Works with a book
- The case method
- workshop method

#### Basic bibliography:

- 1. A. Silberschatz, P. B. Galvin, Operating Systems
- 2. W. Stallings, Introduction to Operating Systems

# Additional bibliography:

1. Web pages on virtual and cloud computing

## Result of average student's workload

Activity	Time (working hours)
1. Participation in lectures	12
2. Literature studying	20
3. Consultation	10
4. Preparation for the exam	5
5. Exam	2

# Student's workload

Source of workload	hours	ECTS
Total workload	49	2
Contact hours	24	1
Practical activities	0	0
