STUDY MODULE DESCRIPTION FORM							
Name of the module/subject						de 11105231011105147	
Field of		, ,		Profile of study		Year /Semester	
Engi	neering Manage	ment - Part-time studies -		(general academic, practical) (brak))	2/3	
Elective path/specialty			Subject offered in:		Course (compulsory, elective)		
Cycle of		stems and Ergonomics	For	Polish m of study (full-time,part-time)		elective	
Cycle of study: Second-cycle studies			1 011	part-time			
No. of h	•	<u></u>		· ·		No. of credits	
Lectur		s: 12 Laboratory: -		Project/seminars:	_	3	
	Oldoool	program (Basic, major, other)		university-wide, from another f	field)		
	ı	(brak)		(brak)			
Education	on areas and fields of sci	ence and art			ECTS distribution (number and %)		
Responsible for subject / lecturer: Responsible for subject / lecturer:							
	nż. Anna Mazur			dr inż Małgorzata Jasiulew			
	ail: anna.mazur@put.p 0048 61 665 33 65	oznan.pl		email: malgorzata.jasiulewicz-kaczmarek@put.poznan.pl tel. 00 48 61 665 33 65			
	ulty of Engineering Ma	anagement		Faculty of Engineering Management			
	Strzelecka 11 60-965 F		- 1	ul. Strzelecka 11 60-965 Poznań			
Prere	quisites in term	s of knowledge, skills and	d s	ocial competencies:			
1	Knowledge	Knowledge in the design and assessment of pro quality systems, elements of systems theory, teamwork.					
2	Skills	Interpretation of standards requirements.					
3	Social competencies	Working in a team.					
Assu	mptions and obj	ectives of the course:					
Presentation of the subsequent steps that are necessary to prepare and implement the quality management system. An assessment of the effectiveness and efficiency of the proposed implementation as well as evaluation of an exploitation after the implementation of the quality management system.							
'		mes and reference to the	edi	ucational results for	aí	field of study	
Knov	/ledge:						
1. Has the knowledge of the contextual studies in relation to the management sciences, ergological sciences as well as research methods applied, of the common and specific conceptual apparatus in relation to management sciences - [K2A_W01]							
2. Knows an in-depth modelling methods and tools that are used for information processes - [K2A_W08]							
3. Is familiar with the modelling methods and tools for decision-making processes - [K2A_W09]							
4. Has an in-depth knowledge of legal standards, their sources, changes and ways to influence organizations - [K2A_W12]							

Skills:

Faculty of Engineering Management

- 1. Is able to correctly interpret and explain the phenomenon of cultural, social, political, legal, economic), and mutual relationships between social phenomena [K2A_U01]
- 2. Can use the theoretical knowledge to describe and analyze the causes, the course of processes and social phenomena (cultural, political, legal, economic), as well is able to formulate his own opinions, select critical data or methods of analysis [K2A_U02]
- 3. Is able to predict, model some complex social processes that involve phenomena from different areas of social life (cultural, political, legal, economic) using advanced methods and tools in the field of economic sciences and a discipline of management sciences [K2A_U04]
- 4. Effectively uses the normative systems, standards and rules (legal, professional, ethical), or e can use them to solve specific problems, has enhanced the ability in relation to the selected category of social ties or the preferred types of norms [K2A_U05]
- 5. Has the ability to use knowledge gained in different areas and forms, extended by a critical review of the effectiveness and suitability of the applied knowledge [K2A_U06]
- 6. It has the ability to propose solutions to a particular problem and to take procedures aimed at reaching a consensus in this area [K2A_U07]

Social competencies:

- 1. Can detect dependencies in terms of cause and effect consequences in the process of objectives implementation. He can also rank the alternative or competing tasks according to their relevance [K2A_K03]
- 2. Can contribute to a factual input in the preparation of the social projects and manage the ventures resulting from these projects [K2A_K05]
- 3. Is aware of the interdisciplinary of knowledge and skills that are needed to solve complex problems of an organization and a necessity to create interdisciplinary teams [K2A_K06]
- 4. Is able to plan and manage business ventures [K2A_K07]

Assessment methods of study outcomes

Formative assessment:

- Classes: an assessment of the current progress of work, presentation of the current results
- Lectures: an assessment of the answers given by the students as well as active participation in discussions on the material covered during lectures

Collective assessment:

a)Classes:

- -public presentation of the achieved solutions
- discussions and answering questions regarding the presentation

b)I ectures:

- a student can take up an exam after achieving credits (on the basis of classes)
- exam in the written form, where at least one of the answers is correct
- each correct answer is scored 0-1
- exam is passed after achieving at least 55% of the correct answers
- overview of the exam

Course description

The essence of the quality management system. Quality management system planning. Organizing quality management system. The quality management system documentation. The effectiveness and efficiency of the implementation of the quality management system.
