Poznan University of Technology Faculty of Engineering Management

STUDY MODULE DESCRIPTION FORM								
	f the module/subject	Code						
•		ment in logistics		1011104331011112835				
Field of	study		Profile of study (general academic, practical)	Year /Semester				
Logistics - Part-time studies - First-cycle			(brak)	2/3				
Elective path/specialty			Subject offered in: Polish	Course (compulsory, elective) obligatory				
Cycle o	f study:		Form of study (full-time,part-time)					
First-cycle studies			part-time					
No. of h	nours			No. of credits				
Lectu	re: 10 Classes	s: 8 Laboratory: -	Project/seminars:	- 4				
Status		program (Basic, major, other)	(university-wide, from another fi	eld)				
		(brak)	(brak)					
Educati	on areas and fields of sci	ience and art		ECTS distribution (number and %)				
Resp	onsible for subj	ect / lecturer:	Responsible for subject	ct / lecturer:				
dr inż. Katarzyna Grzybowska email: katarzyna.grzybowska@put.poznan.pl tel. 61 665 33 96 Faculty of Engineering Management			dr inż. Katarzyna Grzybowska email: katarzyna.grzybowska@put.poznan.pl tel. 61 665 33 96 Faculty of Engineering Management					
	Strzelecka 11 60-965 F		ul. Strzelecka 11 60-965 Po	oznań				
Fiele	quisites in term	ns of knowledge, skills an	iu sociai competencies.					
1	Knowledge	has a basic knowledge of management and organizational processes, including logistics processes, identify the stages of material flow in the enterprise						
2	Skills	able to identify the stages of material flow in the enterprise						
3	Social competencies	there is no indication						
Assu	mptions and obj	ectives of the course:						
-introd	uce students with the	problems of operational managen	nent in logistics processes,					
- to de	velop skills in operatin	g (current) management of logisti	ics processes in the enterprise					
Study outcomes and reference to the educational results for a field of study								
Knov	vledge:							
knows the basic dependencies in logistics and operational management in logistics - [K1A_W14]								
2. can explain basic concepts in logistics and operational management in logistics - [K1A_W15]								
3. can recognize basic phenomena characteristic for logistics and operational management in logistics - [K1A_W16]								
4. can explain in detail the characteristic concepts for logistics and operational management in logistics - [K1A_W17]								
5. knows how to formulate basic dependencies within operational management in logistics - [K1A_W18]								
6. can	6. can identify current trends in logistics and operational management in logistics - [K1A_W19]							
7. can	7. can characterize best practices in operational management in logistics - [K1A_W20]							
Skills:								

Faculty of Engineering Management

- 1. can search based on literature of the subject and other sources and in an orderly manner present information on the problem within the framework of logistics and operational management in logistics [K1A_K01]
- 2. is able to present the problem within the framework of logistics and operational management in logistics [K1A_K02]
- 3. is able to independently develop a set, within the framework and operational management in logistics problem [K1A_U05]
- 4. can formulate using analytical, simulation or experimental methods within the framework of and operational management in logistics design task and solve this task [K1A_U09]
- 5. is able to assess economically the chosen problem within the framework of logistics and operational management in logistics [K1A_U12]
- 6. can perform critical analysis on the problem within the framework of logistics and operational management in logistics [K1A_U13]
- 7. can design using the appropriate methods and techniques of an object, system, or process that meets the requirements of operational management in logistics [K1A_U16]

Social competencies:

- 1. is sensitive to the effects of non-technical aspects and engineering activities, including its impact on the environment, and the related responsibility for decisions in operational management in logistics [K1A_K02]
- 2. can correctly identify and resolve the dilemmas connected with performing the profession of logistics [K1A_K05]
- 3. knows the typical engineering technologies in logistics and operational management in logistics [KlnzA_W05]

Assessment methods of study outcomes

Formative assessment:

current check of the acquired knowledge and skills learnt during lectures

Within the scope of the exercises: on the basis of an assessment of the current progress of tasks (self and in groups, expression of opinions)

Lectures: based on answers to questions about the material discussed in the lectures

Collective assessment:

a test based written exam within exam session

Within the scope of the exercises: on the basis of public presentation on the subject; a written test of the converted material Lectures: Written answer to open questions; a minimum of 60% points;

Course description

- 1. logistics system; Process management; Flow and synchronization
- 2. Mapping operational processes of logistics (mapping methods algorithms, IDEF); Flowchart technique; Defining symbols; Visualization of work flow; Identify actions that add and add values; Identification of opportunities for improvement (Kaizen)
- 3. Flow mapping; Vulnerability analysis of current activities and necessary functions; Demand change buffer; forecast and plan; flow and synchronization; Identify, track, and implement key performance indicators (KPIs); Identification of process improvement opportunities (DMAIC; PDCA);
- 4. Analysis using mapping techniques; Identifying opportunities to improve processes;
- 5. Identification of errors in algorithms and schemes and correct algorithms;
- 6. Elaboration of algorithm of selected process elaboration of procedure;
- 7. Process maps according to IDEF methodology;
- 8. Algorithms of selected activities; Troubleshooting Techniques (Processes: Defining a Problem, Gathering Information, Identifying Alternatives, Assessing Opportunities and Choosing the Best Option, Taking Action, Assessing Activities, Mapping Value Streams
- 9. Process management and change management; Implementation of the organized communication process; Project change and management (project methodology during project management: methods and processes); Optimization of the new process; Supply chain analysis using value stream mapping

Didactic methods

In lectures:

- 1. Information lecture
- 2. Conversational lecture

In the field of self-employment:

1. Working with a book

In the scope of exercises:

- 1. The exercise method? case method
- 2. Demonstration method
- 3. Guided text method
- 4. Simulation method

Faculty of Engineering Management

5. Discussion

Basic bibliography:

- 1. Waters D., Zarządzanie operacyjne, PWN, Warszawa, 2007
- 2. Bardi E.J., Coyle J.J., Langley C.J., Zarządzanie logistyczne, PWE, Warszawa, 2002
- 3. Grzybowska K., Łopatowska J., Zarządzanie operacyjne w łańcuchu dostaw, L. Zawadzka, G. Zieliński (red.), Zarządzanie operacyjne w teorii i praktyce, Systemy, procesy, narzędzia, Wydawnictwo Politechniki Gdańskiej, Gdańsk 2013
- 4. Jasiński Z. (red.), Podstawy zarządzania operacyjnego, Wolters Kluwer, Gliwice, 2010
- 5. Szczepańska K., Bugdol M. (red.), Podstawy zarządzania procesami, Difin, Warszawa, 2016
- 6. Waters D., Zarządzanie operacyjne, PWN, Warszawa, 2007
- 7. Bardi E.J., Coyle J.J., Langley C.J., Zarządzanie logistyczne, PWE, Warszawa, 2002
- 8. Grzybowska K., Łopatowska J., Zarządzanie operacyjne w łańcuchu dostaw, L. Zawadzka, G. Zieliński (red.), Zarządzanie operacyjne w teorii i praktyce, Systemy, procesy, narzędzia, Wydawnictwo Politechniki Gdańskiej, Gdańsk 2013
- 9. Jasiński Z. (red.), Podstawy zarządzania operacyjnego, Wolters Kluwer, Gliwice, 2010
- 10. Szczepańska K., Bugdol M. (red.), Podstawy zarządzania procesami, Difin, Warszawa, 2016

Additional bibliography:

- 1. Kisperska-Moroń, Krzyżaniak S. (red.), Logistyka, Biblioteka Logistyka, Poznań, 2009
- 2. Bitkowska A., Zarządzanie procesowe we współczesnych organizacjach, Difin, Warszawa, 2013
- 3. Kisperska-Moroń, Krzyżaniak S. (red.), Logistyka, Biblioteka Logistyka, Poznań, 2009
- 4. Bitkowska A., Zarządzanie procesowe we współczesnych organizacjach, Difin, Warszawa, 2013

Result of average student's workload

Activity	Time (working hours)
1. Lectures	10
2. Participation in exercises	8
3. Consultations	40
4. Prepare for Training	20
5. Preparing to pass exercises	5
6. Assessment of lectures	3
7. Discussion of the results of assessment of lectures	2

Student's workload

Source of workload	hours	ECTS
Total workload	88	4
Contact hours	63	3
Practical activities	8	1
