		and principles of the law regulatir	ng the activities of logistics operation	ators - [(K2A_W28)]	
Skills					
1. 1. 2. 2. of Refe		rning process in international logi relevant to the logistics in accord - [(K2A_U06)]	- /-	level B2 + European Framework	
3. 3.	can formulate and	solve problems through multi-disc systems - [(K2A_U10)]	ciplinary integration of knowledg	e in the fields and disciplines	
4. 4. and rela	is able to assess th ated functional areas	ne usefulness and the usability of - [(K2A_U12)]	new developments (techniques	and technologies) in logistics	
	t to the construction of	e basis of usefulness and limitatio or reorganization of the logistics s		ds to solve engineering problems	
Socia	I competencies:				

1. is aware of the responsibility for the formulation and communication to the public, in particular through the media, information and opinion on the technical and other achievements in the field of logistics; shall endeavor to provide information and feedback in a universally understandable, maintaining objectivity - [(K2A_K07)]

2. properly identifies and resolves the dilemmas associated with the practice manager logistics. Is aware of the need to respect the rules of professional ethics and respect for the diversity of views and cultures - [(K2A_K05)]

Assessment methods of study outcomes

LECTURE:

- forming rating: based on answers to questions related to the material discussed in the lecture

- summary rating: on the basis of a written test

EXERCISES:

- forming rating: assessment of activity during the classes

- summary rating: on the basis of written colloquium

PROJECT:

- forming rating: assessment of activity during the classes

- summary rating: development of a project in the field of international logistics

Course description

1. The essence of international logistics - definitions and basic characteristics.

2. The importance of modern international logistics in business. Global flows in the world and in Europe. International trade. The structure of goods and services flows.

3. International transport and logistics networks - characteristics of technical logistics infrastructure in relation to multimodal transport (maritime, air, road and rail).

4. Description and characteristics of selected elements of point infrastructure: distribution centers, seaports and airports, border crossings, car parks in the world and in Europe.

5. Description and characteristics of selected elements of linear infrastructure: roads, railways, sea and air connections.

6. Cultural and organizational aspects of international logistics. The client and his diverse requirements and preferences in the world. Cultural elements with respect to global standards of logistic customer service.

7. The impact of logistics on the level of international competitiveness of countries and enterprises. Comparative analysis (LPI) in selected countries and regions against other economic indicators.

8. Designing and evaluation of global / international supply chains. Organization of projects, multi-criteria assessment of various logistic solutions.

DIDACTIC METHODS

LECTURE: conversational lecture, talk

EXERCISES: auditorium exercises, case method, work with a book

PROJECT: project method

Basic bibliography:

1. E. Gołembska (2004): Logistyka międzynarodowa, Warszawa: PWN.

2. E. Gołembska, J. Majchrzak-Lepczyk, Z. Bentyn (2015): Eurologistyka, PWN.

Additional bibliography:

1. E, Gołembska (2005): Logistyka w internacjonalizacji przedsiębiorstw UE, Wyd. Akademii Ekonomicznej w Poznaniu. 2. J.J. Coyle, E.J. Bardi, C.J. Langes jr (2002): Zarządzanie logistyczne, Polskie Wydawnictwo Ekonomiczne.

Result of average student's workload

Activity	Time (working hours)				
1. Participation in lectures	15				
2. ticipation in exercises		15			
3. Prepare for exercises		15			
4. Preparing to pass exercises		10			
5. Preparing to exam		20
