STUDY MODULE DESCRIPTION FORM							
	f the module/subject						
Field of	oitation of Te	1010601131010610379 Year /Semester					
			Profile of study (general academic, practical)				
	space Engine	ering	general academic	2/3			
Elective path/specialty Safety and Management of Aviation			Subject offered in: Polish	Course (compulsory, elective) obligatory			
Cycle of		u Management of Aviation	Form of study (full-time,part-time)	Obligatory			
Cycle of							
	First-	cycle studies	full-1	time			
No. of h	ours			No. of credits			
Lectur	re: <b>1</b> Clas	ses: 1 Laboratory: -	Project/seminars:	- 2			
Status o	of the course in the st	udy program (Basic, major, other)	(university-wide, from another f				
		other	unive	ersity-wide			
Education	on areas and fields o	science and art		ECTS distribution (number and %)			
Boon	oncible for ou	biaat / laaturari					
Responsible for subject / lecturer:							
-	ab. inż. Michał Lib ail: michal.libera@p						
	+4861 665-2223	ut.poznan.pi					
	ulty of Transport E	5 5					
ul. F	Piotrowo 3 60-965	Poznań					
Prere	quisites in te	rms of knowledge, skills an	id social competencies:				
4	Knowledge		edge of the means of transport a	nd operation of their			
1	Knowledge	components	components				
2	Chille		The student is able to analyze and synthesize information, draw conclusions, formulate and				
2	Skills	justify opinions	justify opinions				
3	Social The student is aware of the importance of maintenance and service in the life cycle of the						
	competencie	es <sup>object</sup>	object				
Assumptions and objectives of the course:							
Acquiring the ability to formulate and solve simple problems of operation (operation and maintenance) means of transport							
	01			- (			
14	-	comes and reference to the	educational results for	a field of study			
	vledge:						
	•	of exploitation, maintenance, operation		limit state - [T1A_W06]			
<ol> <li>He knows the typical patterns of changes in the technical state - [T1A_W06]</li> <li>He knows the issues of unfitness functional and error handling - [T1A_W06]</li> </ol>							
			0 1 = 1	esting of State - IT10 W/061			
<ul> <li>4. It has a basic knowledge of handling the operational and correction, periodic reviews and testing of State - [T1A_W06]</li> <li>5. Knows basic strategies of technical services, operating schedules, operating levels - [T1A_W06]</li> </ul>							
Skills		service, operating our		1			
		cal description of the state changes	in the operational - IT1A U041				
2. He can analyze the data assuming the Weibull distribution (graphical method and analytical) - [T1A_U04]							
3. He can identify the types, causes and consequences of failures - [T1A_U04]							
Social competencies:							
1. The student is aware of the importance of the rational use of means of transport in the aspects: technical, security, economic and ecological - [T1A_U04]							
Assessment methods of study outcomes							

The audit work, which allow the assessment of the skills acquired by the student in the analysis of operational data. Test and personal interview, the essence of which is to check the understanding of the substance of the issues the technical operation of the means of transport as described in the contents of the program.

## **Course description**

#### 1) Operation Support

Technical state: the parameter value - tolerance, load - bearing capacity, quality - standard (reference). The useful life between the damage.

2) Changes in the state of technical

Typical waveforms changes . Technical criteria for the technical condition

3) Statistical description of changes in the operational

Numerical characteristics of the random variable . Functional characterization of the random variable

4) Evaluation of the potential equipment and process

Determination of the tolerance limits . Random changes in load and capacity. Factor of safety and security of supply

#### 5) Analysis of data

Analysis of the data assuming the Weibull distribution (graphical method and analytical method) . Evaluation of an average period between damage and preparedness

6) Analysis of the types, causes and consequences of disablement

Unfitness functional . Errors use

#### 7) Handling

Handling operational and correction . Periodic reviews and audits of state. The technical services : Strategies for handling, operating schedules , operating levels

### Basic bibliography:

1. Gronowicz J.: Eksploatacja techniczna I utrzymanie samochodów. Wydawnictwo Uczelniane Politechniki Szczecińskiej, Szczecin 1997

2. Hebda M.: Eksploatacja samochodów. Wydawnictwo Instytutu Technologii Eksploatacji, Radom 2005

3. Smalko Z.: Podstawy eksploatacji technicznej pojazdów. Warszawa, Wydawnictwo Politechniki Warszawskiej, 1987

## Additional bibliography:

1. Macha E.: Reliability of machines. Wydawnictwo Politechniki Opolskiej, Opole 2001

2. Gołąbek A.: Eksploatacja i niezawodność maszyn. Wrocław, Wyd. Politechniki Wrocławskiej, 1988

3. Niziński S.: Eksploatacja obiektów technicznych. Wyd. ITeE, Radom, 2002

# Result of average student's workload

Activity	Time (working hours)
1. Participation in lectures and exercises	30
2. Temember the content of the courses	8
3. Consultation	2
4. Exam Preparation	7
5. Participation in the exam	3

Student's workload				
Source of workload	hours	ECTS		
Total workload	50	2		
Contact hours	35	1
