

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Undergraduate practice		Code 1010601141010639089
Field of study Aerospace Engineering	Profile of study (general academic, practical) general academic	Year /Semester 2 / 4
Elective path/specialty Aircraft Engines and Airframes	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) full-time	
No. of hours Lecture: - Classes: - Laboratory: - Project/seminars: 120		No. of credits 6
Status of the course in the study program (Basic, major, other) other		(university-wide, from another field) university-wide
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 6 100% 6 100%
Responsible for subject / lecturer: phd Łukasz Brodzik email: lukasz.brodzik@put.poznan.pl tel. 61 665-2214 Faculty of Transport Engineering Piotrowo 3 street, 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	has knowledge of the current rules for the implementation of internships, knows the rules of practice and the conditions for their passing, has basic knowledge of the issues covered by the study program
2	Skills	has the ability to creatively use the knowledge acquired during studies
3	Social competencies	can work in a working group, is able to make a fair division of tasks in a group in a transparent way, can correctly interpret and perform the tasks he has been given and can make a verbal presentation of the results of his work
Assumptions and objectives of the course: -Verification of the theoretical knowledge possessed by the student with reality, gaining new professional experience in real working conditions		
Study outcomes and reference to the educational results for a field of study		
Knowledge: 1. has an extended basic knowledge necessary for understanding specialist subjects and specialist knowledge on building methods of machine construction - [[K1A_W23]]		
Skills: 1. can prepare technical documentation descriptively - drawing engineering tasks - [[K1A_U06]]		
Social competencies: 1. is aware of the importance and understands the non-technical aspects and effects of engineering activities, including its impact on the environment and the related responsibility for decisions - [[K1A_K02]]		
Assessment methods of study outcomes		
-Assessment of practices on the basis of a report on the implementation of practices, certified by the company, assessment of the supervisor of the company's practices.		
Course description		
-Getting to know the functioning of production or service enterprises that carry out activities related to design, manufacture or operation in the field of aviation and aeronautics		

Basic bibliography:		
1. Rules for the implementation of WIT practices		
2. Framework program of practices at WIT		
3. Forms of documents necessary for the implementation of the agreement practices, report, detailed practices program		
Additional bibliography:		
Result of average student's workload		
Activity	Time (working hours)	
1. Practical classes	0	
Student's workload		
Source of workload	hours	ECTS
Total workload	120	6
Contact hours	1	1
Practical activities	119	5
