An attempt to assess the role and importance of the workplace in the economy and life of the local community and to gain by the student experience in the labor market		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. The student should have knowledge of the tasks being performed on the professional practice - [K2A_W05]		
2. The student should have knowledge of the tasks being performed on the professional practice - [K2A_W09]		
3. The student should have knowledge of the tasks being performed on the professional practice - [K2A_W10]		
4. The student should have knowledge of the tasks being performed on the professional practice - [K2A_W11]		
5. The student should have knowledge of the tasks being performed on the professional practice - [K2A_W12]		
6. The student should have knowledge of the tasks being performed on the professional practice - [K2A_W14]		
7. The student should have knowledge of the tasks being performed on the professional practice - [K2A_W20]		
8. The student should have knowledge of the tasks being performed on the professional practice - [K2A_W22]		
Skills:		

1. The student is able to use the knowledge acquired in the current course of studies in a practical way - [K2A_U01]
2. The student is able to use the knowledge acquired in the current course of studies in a practical way - [K2A_U02]
3. The student is able to use the knowledge acquired in the current course of studies in a practical way - [K2A_U08]
Social competencies:
1. Is aware of the importance of knowledge in solving various social and technical problems in the workplace - [K2A_K01]
2. Is aware of the importance of knowledge in solving various social and technical problems in the workplace - [K2A_K02]
3. Is aware of the importance of knowledge in solving various social and technical problems in the workplace - [K2A_K04]
4. Is aware of the importance of knowledge in solving various social and technical problems in the workplace - [K2A_K05]
5. Is aware of the importance of knowledge in solving various social and technical problems in the workplace - [K2A_K06]

Assessment methods of study outcomes		
Assessment of practices on the basis of a report on the implementation of practices, certified by the company, assessment of the supervisor of the company's practices. The possibility of passing professional work on the professional practice (condition of program compliance)		
Course description		
Getting to know the functioning of production or service enterprises implementing logistics activities (including in particular transport) for their own use (on their own or externally) or providing logistics services to third parties, companies giving the opportunity to familiarize themselves with the basic logistics issues (in especially transport), such as: ? construction and operation of transport means (knowledge of modern propulsion systems, diagnostics of drive systems, technical condition control), ? transport (transport process, technology, documentation, legal regulations as well as organization and management of transport), ? forwarding (forwarding process, documentation, legal regulations and contact with carriers), ? storage (handling and storage process, technology, documentation, legal regulations as well as organization and management of warehouse and inventory), ? logistics (including supply and distribution logistics, possibly production), ? rolling stock (especially truck, but also personal transport used in business operations, management and sale, use and maintenance process), ? loads (types, methods of preparation for transport, loading and securing on a vehicle), ? and other related issues.
