

<b>STUDY MODULE DESCRIPTION FORM</b>			
Name of the module/subject <b>Automation and industrial measurements</b>		Code	
Field of study <b>Chemical and Process Engineering</b>		Profile of study (general academic, practical) <b>general academic</b>	Year /Semester <b>3 / 5</b>
Elective path/specialty -		Subject offered in: <b>Polish</b>	Course (compulsory, elective) <b>obligatory</b>
Cycle of study: <b>First-cycle studies</b>		Form of study (full-time,part-time) <b>full-time</b>	
No. of hours Lecture: <b>30</b> Classes: - Laboratory: <b>30</b> Project/seminars: -		No. of credits <b>4</b>	
Status of the course in the study program (Basic, major, other) <b>basic</b>		(university-wide, from another field) <b>university-wide</b>	
Education areas and fields of science and art <b>technical sciences</b> <b>Technical sciences</b>		ECTS distribution (number and %) <b>4 100%</b> <b>4 100%</b>	
<b>Responsible for subject / lecturer:</b>  dr hab. inż. Marek Ochowiak e-mail: marek.ochowiak@put.poznan.pl tel. 61 665 2147 Wydział Technologii Chemicznej ul. Piotrowo 3, 60-965 Poznań tel.: 61 665 2652		<b>Responsible for subject / lecturer:</b>	
<b>Prerequisites in terms of knowledge, skills and social competencies:</b>			
1	<b>Knowledge</b>	- basics of chemical and process engineering, - basics of electronics and electrotechnics, - basic knowledge of construction and operating principles of process equipment.	
2	<b>Skills</b>	- analysis of the measurement data obtained in the field of chemical and process engineering, - performing mathematical calculations.	
3	<b>Social competencies</b>	- the graduate is aware of the advantages and limitations of individual and group work in solving industrial problems, - in addition, the graduate knows the limitations of his knowledge and sees the necessity of its deepening.	
<b>Assumptions and objectives of the course:</b>  Knowledge in the field of technological measurements, control and measurement equipment in the chemical industry as well as elements of industrial automation and process control.			
<b>Study outcomes and reference to the educational results for a field of study</b>			
<b>Knowledge:</b>			
1. The graduate has a knowledge of automatics and industrial measurements to the extent necessary to formulate and solve simple calculating to choose the equipment to conduct experimental research [K_W06] 2. The graduate knows the principles of control and measurement systems [K_W07] 3. The graduate has a knowledge of control of technological processes and measurements in chemical technology and engineering [K_W07]			
<b>Skills:</b>			
1. The graduate can acquire information from literature, databases and other sources. [K_U01] 2. The graduate can conduct experiments in automation and industrial measurement, interpret their results and draw conclusions. [K_U08]			
<b>Social competencies:</b>			
1. The graduate understands the need to develop and improve his/her professional and personal competencies and systematically reports on laboratory exercises [K_K01]			

<b>Assessment methods of study outcomes</b>			
Knowledge: Test: 1, 2,3			
Skills: Test: 1 Reports on laboratory exercises: 2			
Social competencies: Written test and oral test: 1			
<b>Course description</b>			
During the course are discussed: <ul style="list-style-type: none"> <li>• Introduction,</li> <li>• Automatic regulation systems.</li> <li>• Setting and executive elements.</li> <li>• The role of executive systems in industrial control systems.</li> <li>• Regulators.</li> <li>• Stability and quality of control.</li> <li>• Signalization, blockades and security.</li> <li>• Measurement sensors.</li> <li>• Measurements, measuring instruments and transducers.</li> <li>• Control of quantities and technological processes in chemical technology and engineering.</li> <li>• Automation in the plant (video presentation).</li> </ul>			
<b>Basic bibliography:</b> <ol style="list-style-type: none"> <li>1. Piekarski M., Poniewski M.: Dynamika i sterowanie procesami wymiany ciepła i masy, WNT, Warszawa 1994.</li> <li>2. Senczyna S.: Modelowanie sterowania procesów przemysłowych, Wyd. Politechniki Śląskiej, Gliwice 1997.</li> <li>3. Blachuta M.: Laboratorium teorii sterowania i podstaw automatyki, Wyd. Politechniki Śląskiej, Gliwice 1999.</li> <li>4. Gessing R.: Podstawy automatyki, Wyd. Politechniki Śląskiej, Gliwice 2001.</li> <li>5. Mikulski J.: Podstawy automatyki – liniowe układy regulacji, Wyd. Politechniki Śląskiej, Gliwice 2001.</li> <li>6. Urbaniak A.: Podstawy automatyki, Wyd. Politechniki Poznańskiej 2001.</li> <li>7.
